ARTICLE 86 - SPECIAL USE PERMITS

8601. Purpose:

The purpose of this Section is to establish equitable procedures and criteria which shall be applied in the determination of requests to establish Special Land Uses.

- A. In establishing Land Use Districts, as set forth in this Ordinance, it is recognized that there is need to provide a controllable and reasonable flexibility in the requirements for certain land uses, while allowing practical latitude for the investor; and, at the same time, maintain adequate provisions for the security of the health, safety, convenience, and general welfare of the inhabitants of Maple Grove Township. In order to accomplish such a dual objective, provision is hereby made to allow for issuance of Special Land Use Permits.
- B. Special Uses are those uses of land which are not essentially incompatible with the uses permitted in a Zoning District, but possess characteristics or locational qualities which require individual review and restriction in order to avoid incompatibility with the natural environment of the site, the character of the surrounding area, public services and facilities, and adjacent land usages.
- C. The Standards for approval and requirements provided for under provisions of this Section shall be in addition to those required elsewhere in this Ordinance which are applicable to the Land Use under consideration.
- D. This Section hereby authorizes the Maple Grove Township Planning Commission, in its absolute discretion, to issue Special Land Use Permits, provided:
 1. The proposed use is one listed as a Special Land Use for that District in which said use is proposed to be located; and
 2. The Maple Grove Planning Commission is satisfied, before approving a Special Land Use Permit request that
 - a. the standards of the District in which the Special Land Use is to be located are fulfilled; and
 - b. that the Special Land Use, under the conditions, controls, limitations, circumstances and safeguards proposed therefor, and imposed by the Planning Commission, would be compatible with other uses expressly permitted within said district, with the natural environment and the capacities of public service and facilities affected by the land use; would not, in any manner, be detrimental or injurious to the use or development of adjacent properties, to the occupants thereof, or to the general neighborhood; would promote the public health, safety, morals and general welfare of the community; would encourage the use of lands in accordance with their character and adaptability and that the standards required by the Planning Commission for the allowance of such Special Land Use, can and will, in its judgement, be met at all times by the Applicant. The burden of proof of facts which might establish a right to a Special Land Use under the foregoing standards shall be upon the Applicant.

8602. Required Information:

Information Required in Application:

- A. An application for Special Use Permit shall include:
 1. The applicant's name and address.
 2. A signed affidavit that the applicant is the owner, or has an ownership interest, or is acting on the owner's behalf.
 3. The address and legal description of the property.

4. A specific statement and supporting information regarding the required findings for the Special Use Permit, as stated in Section 8603.E of this Ordinance.
 5. A detailed site plan as specified in Section 9406 of this Ordinance.
 6. A complete description of the proposed development including: Areas of the site, the number of parcels or units; and the number and characteristics of the population impact such as density, elderly persons, school children, tourists, family size, and related material as applicable.
 7. Expected demands on community services, and how these services are to be provided, to specifically include: school classroom needs, volume of sewage for treatment, volume of water consumption related to groundwater reserves or community system capacity, change in traffic volume on adjacent roads and other factors that may apply to the particular development.
 8. Statements relative to the impact of the proposed development on soil erosion, shoreline protection, wildlife habitat, air pollution, water pollution (ground and surface), noise and the scale of development in terms of the surrounding environment.
 9. Evidence of having received or having an agreement for, or concurrent approval for, any other necessary permits required prior to a Construction Code Permit.
- B. In addition, the applicant may be required to furnish:
1. Elevations on all buildings, including accessory buildings.
 2. An environmental assessment.
 3. Measures which will be undertaken to control soil erosion, shoreline protection, excessive noise, or adverse impacts of the development on the surrounding properties.
- C. The applicant shall certify that the information included is correct and that measures proposed to mitigate adverse impacts will be completed in a timely fashion, if the Special Use Permit is approved.

8603. Special Land Use Procedure:

- A. All applications for Special Land Use Permits shall be filed with the Zoning Administrator, in quadruplicate, and shall include the documents, above set forth, together with the fee, in accordance with the Schedule of fees adopted by the Maple Grove Township Board, to cover the cost of processing the application. No part of the fee shall be refundable.
- B. If the application is complete and in the proper form, the Zoning Administrator shall notify the Planning Commission which shall schedule and hold a hearing upon the request.
- C. The Zoning Administrator shall notify the following persons of the application being considered, so that notice is sent not less than fifteen (15) days before the date the application will be considered and the notices sent to:
 1. The applicant.
 2. The owner of the property, if different.
 3. The owners of all real property within three-hundred (300) feet of the boundary of the property for which the approval has been requested, as shown by the latest assessment roll, regardless of whether the owner and property is located in Maple Grove Township or not.
 4. Occupants of any structures within three-hundred (300) feet of the boundary of the property for which the approval has been requested, regardless of whether the owner and property is located in Maple Grove Township or not. Notification need not be given to more than one (1) occupant of a structure, except that, if a structure contains more than one (1) dwelling unit or spatial area owned or leased by different individuals, partnerships, businesses, or organizations, one (1) occupant of each unit or spatial area shall receive notice. In the case of a single structure containing more than four (1) dwelling units or other distinct spatial areas owned or leased by different individuals, partnerships, businesses, or organizations, notice may be given to the manager or owner

of the structure who shall be requested to post the notice at the primary entrance to the structure.

5. The general public by publication in a newspaper which circulates in Maple Grove Township.

6. The members of the Planning Commission.

Except as provided in paragraph 5., the notice to other persons shall be mailed or personally delivered. If the name of the occupant of any property required to be given notice is not known, the term "occupant" may be used in making notification under this Section 8603.C.

D. The notice required under Section 8603.C. shall include:

1. The nature of the Special Land Use Permit being requested.
2. The property(ies) for which the request has been made.
3. A listing of all existing street addresses (if any) within the property(ies) which is(are) the subject of the Special Land Use.

7. For members of the Planning Commission only, a complete copy of the Special Land Use Permit application and supporting documents in the record.

E Following such hearing, the Planning Commission shall either grant or deny a permit for such Special Land Use and shall reduce its decision to writing which includes a statement of findings and conclusions relative to the Special Land Use that specifies the basis for the decision and any conditions imposed. All conditions upon which any such permit is granted shall be specified in detail by the Planning Commission in its decision and shall be filed with the Zoning Administrator of the township. Any conditions upon which approval is based shall be reasonable and designed to protect natural resources, the health, safety, and welfare and the social and economic well-being of the owners and occupants of the land in question, of the area adjacent thereto and of the community as a whole; constitute a valid exercise of the police power and be related to the purposes which are affected by the proposed use or activity; be consistent with the intent and purpose of the zoning ordinance; designed to insure compatibility with adjacent uses of land and the natural environment; and designed to insure that public services and facilities affected by a proposed land use or activity will be capable of accommodating increased service and facility loads caused by the land use or activity.

F The Planning Commission shall have the right to limit the duration of a Special Land Use where the same is of a temporary nature and may reserve the right of annual review of compliance with the conditions imposed upon such use. Any use failing to comply with such conditions may be terminated by action of said Planning Commission after a hearing upon application of any aggrieved party.

G The plot plan and specifications and all conditions imposed by the Planning Commission shall be recorded with the township and shall be incorporated as a part of the Special Land Use permit. Violations of any of these at any time shall cause revocation of said permit and said special land use shall cease to be a lawful use.

H Any property which is the subject of a Special Land Use Permit which has not been used for a period of Sixty (60) days (without just cause being shown, which is beyond the control of the owner and which is acceptable to the Planning Commission) for the purposes for which such Special Land Use Permit was granted, shall thereafter be required to be used for only permissible uses set forth in the particular zoning classification and the permit for such special land use shall thereupon terminate.

I To insure compliance with the zoning ordinance and any conditions imposed by the Planning Commission as necessary to protect natural resources or the health, safety and welfare of the

residents of the township and future users or inhabitants of the proposed project or project area, the Planning Commission may require a cash deposit, certified check, or irrevocable bank letter of credit or surety bond covering the estimated cost of furnishing such condition which is conditioned upon the faithful completion of the project. Such security shall be deposited with the Township Clerk at the time of the issuance of the permit authorizing the commencement of such project. Where the Project will take more than Ninety (90) days to be completed, the Planning Commission may authorize a rebate of any cash deposit in reasonable proportion to the ratio of the work completed as the work progresses.

8604. Special Land Use - Specific Standards:

A. Communication Tower Facilities

1. Communication Tower Facilities may be permitted by special use permit pursuant to Section 8601 et seq. of this Ordinance provided said use:
 - a. Shall be located centrally on a contiguous parcel of not less than one (1) times the height of the tower measured from the base of said tower to all points on each property line or leased area boundary. The setback standard may be reduced by up to fifty percent (50%), if the construction plan, the tower, and its guying/anchoring system are Certified by a Registered Professional Engineer as being safe from the hazard of falling onto public roads or adjoining properties.
 - b. All guy wires/cables and anchors shall meet the zoning setback standards of the district.
 - c. No antenna or similar sending/receiving devices appended to the tower, following its approved construction, shall be permitted if it exceeds the engineered design capacity of the tower thereby jeopardizing the tower's structural integrity.
2. The following standards will be required for all Communication Tower Facilities:
 - a. Wireless Communication Facilities may be permitted if it is found that there is no reasonable opportunity for them to be built as a permitted use in compliance with Section 1072 of this Ordinance. Information must be submitted to show efforts made to screen, co-locate or place such facilities on an existing structure.
 - b. The proposed height meets FCC and/or FAA regulations.
 - c. Towers must be equipped with devices to prevent unauthorized climbing or the base enclosed by a fence to prevent unauthorized access to the tower.
 - d. All reasonable measures are taken to blend the tower into the landscape, including greenbelt planting and/or screening, painting and/or concealing the tower in a "stealth" design.
 - e. All new towers shall be constructed in such a manner so as to provide co-location of at least five additional antennae. Depending on tower height, additional co-located antennae may be required by the Commission. These antennae sites shall be made available at a fair market value on a need for basis to anyone wanting to mount commercial communication equipment. This commitment shall be reflected as a condition in the special use permit for the tower. No new construction will be approved, unless it can be demonstrated that space on existing towers is unavailable or unsuitable.
 - f. Protective fencing and screening may be required to be placed around all guy wire anchor points as appropriate to the site.
 - g. All communication tower facilities shall be removed and the site restored to its original condition by the property owner or lessee within ninety (90) days of being abandoned (no longer used).

B. Sexually Oriented Business

1. Purpose. It is recognized that sexually oriented businesses have a deleterious effect upon adjacent areas, causing blight, an increase in crime, a decrease in property values, a chilling effect upon other businesses and residents, and a downgrading of the quality of life in adjacent areas, especially when such uses are concentrated in the same general area, it is considered necessary and in the best interest of the orderly and better development of the community to prohibit the overcrowding of such uses into a particular location and require their dispersal throughout the commercial and industrial zones of the Township to thereby minimize their adverse impact to the best extent possible on any other permitted use.
2. Conditions. In order to obtain and retain a special use permit for operation of a sexually oriented business regulated use as defined by this Ordinance, the following conditions must be met, in addition to all other standards set forth herein for special use permits:
 - a. A special use permit must be acquired through the special use procedures as described in this Section;
 - b. In order to prevent the undesirable concentration of sexually oriented businesses, the regulated uses as defined by this Section shall not be located within 1,000 feet of two other such regulated uses as defined by this Section, nor within 300 feet of any residentially zoned district, school, daycare center, church or other religious institution, or public park or other public facility, as measured along a line forming the shortest distance between any portion of the respective properties;
 - c. The regulated uses, as defined by this Section, shall only operate between the hours of 8 a.m. and 10 p.m.;
 - d. There shall be a manager on the premises at all times;
 - e. No one under the age of 18 shall be allowed onto the premises by the on site manager of the regulated use;
 - f. If a transfer of ownership or control occurs the existing special use permit shall be considered void. A new permit shall be applied for in advance of the proposed transfer;
 - g. No product or service for sale or gift, or any picture or other representation thereof, which relates in anyway to "specified sexual activities" or "specified anatomical areas", shall be displayed so as to be visible from the street or exterior of the building of the regulated use

ARTICLE 88 - PLANNED UNIT DEVELOPMENT (P.U.D.)

8801. Purpose:

The purpose of this Section is to permit flexibility in the regulation of land development; encourage innovation in land use and variety in design, layout, and type of structures constructed; achieve economy and efficiency in the use of land, natural resources, energy, and the provision of public services and utilities; encourage useful open space; and provide better housing, employment and shopping opportunities particularly suited to the needs of the residents of the township; and encourage the use, reuse and improvement of existing sites and buildings when the uniform regulations contained in other zoning districts do not provide adequate protection and safeguards for the site and surrounding area. This district is intended to accommodate developments with the mixed or varied uses, sites with unusual topography or unique settings within the community, or on land which exhibits difficult or costly development problems and shall not be allowed where this zoning classification is sought primarily to avoid the imposition of standards and requirements of other zoning classifications rather than to achieve the stated purpose above.

8802. Permitted Uses:

- A. All residential uses; all business, service and professional offices; all light manufacturing; and all commercial uses or any combination of uses may be permitted in a planned unit development, and accessory uses allowed in land district regulations.
- B. Any PUD which includes uses which are not permitted or specially permitted in the underlying zoning district will require a zoning amendment in addition to the approval of an administrative permit under this Article.
- C. Any PUD which increases the density or size of any use or uses beyond what is permitted or specially permitted in the underlying zoning district will require a zoning amendment in addition to the approval of an administrative permit under this Article.

[Annotation: Parts B. and C. of this Section added by amendment adopted September 10, 2007, effective October 4, 2007 at 12:01am.]

8804. Establishment, Amendment Procedure:

A PUD zoning classification shall be established, amended or removed pursuant to the Procedure set forth in the applicable sections of this Ordinance and the additional procedures set forth in this Section, provided, however, that a PUD zoning classification may be initiated only by a Petitioner.

8805. Standards for Approval:

Based upon the following standards, the Planning Commission, after its review, may deny or approve the proposed Planned Unit Development.

- A. The uses proposed will have a beneficial effect, in terms of public health, safety, welfare, or convenience, or any combination thereof, on present and potential surrounding land uses. The uses proposed will not adversely affect the public utility and circulation systems, surrounding properties, or the environment. This beneficial effect for the Township (not the developer) shall be one which could not be achieved under any other single zoning classification.
- B. The uses proposed shall be consistent with the land use plans adopted by the township.

- C. Usable open space shall be provided at least equal to the total of the minimum usable open space which would be required for each of the component uses of the development. The Planning Commission may, if deemed appropriate, require for Planned Unit Developments, more or less open space than that required by this Zoning Ordinance.
- D. Off-Street Parking sufficient to meet the minimum required in any zoning district in which the Planned Unit Development will be located.
- E. Landscaping shall be provided so as to insure that proposed uses will be adequately buffered from one another and from surrounding public and private property.
- F. Vehicular and pedestrian circulation, allowing safe, convenient, uncongested, and well-defined circulation within and to the district shall be provided.
- G. Major natural, historical and architectural features of the district shall be preserved.

8806. Material To Be Submitted:

The applicant for any PUD zoning classification shall submit the following technical and/or graphic materials together with the application for a PUD classification approval.

- A. A PUD development plan --detailed site plan as specified in Section 9406 of this Ordinance, which also shows all uses and allotted spaces, gross site area, street and vehicular access areas, number of each variety of habitable space, and total open space.
(Annotation: Changed by amendment, August 9, 1995, effective August 10, 1995 at 12:01am.)
- B. The PUD development plan shall indicate the entire contiguous holdings of the petitioner or owner who wishes to develop the entire parcel or any part thereof, and shall include the area and use of land adjacent to the parcel to be developed, which plan shall exhibit any unusual problems of topography, utility services, land usage of land ownership; said plan shall also exhibit all existing and proposed structures, existing and proposed streets, open spaces and other features as required by ordinance or the land development regulations.
- C. The applicant shall present material as to the development's objectives and purposes to be served; proposed financing sources; economic feasibility, conformity to plans and policies of the township market needs; impact on public schools, utilities, and circulation facilities; impact on natural resources; impact on the general area and adjacent property; estimated cost; and a staging plan showing the general time schedule of an expected completion date of the various elements of the plan.

8808. Time for Completion of Development:

The proposed Planned Unit Development District and all proposed buildings, parking spaces, landscaping, usable open space, and amenities must be started within sixty (60) days of the establishment of the district and work must be continued in a reasonably diligent manner and completed within one (1) year of the establishment of the district. Said one (1) year period may be extended if applied for by the petition and granted by Planning Commission in writing following public notice and public hearings. Failure on the part of the owner to secure the written extension shall result in stoppage of all construction.

8809. Guarantee of Completion of Public Improvements:

To assure the completion of the public improvements in the PUD, the developer or his agent shall provide a financial guarantee of performance. This guarantee shall be equal to one hundred twenty (120%) per cent of the estimated construction cost of the public improvements in the PUD. Public improvements shall be taken to mean all improvements which under the plan are to be dedicated or conveyed to the township, or which are to become part of the township system or which the township may become responsible for including such costs as removal or restoration. - A. Minor changes to a previously approved PUD site plan may be approved by the Zoning Administrator without the necessity of a Planning Commission approval, provided that the proposed revision constitutes a minor alteration and does not alter the basic design or any specific conditions of the plan as agreed upon by the Planning Commission. The Zoning Administrator shall record all such changes on the original PUD site plan and shall advise the Planning Commission of all said minor revisions within fifteen (15) days of said administrative approval. Minor alterations or revisions under this action shall be limited to:

 2. Shifting of building height and elevations, providing such shifting does not exceed ten (10%) per cent of the previously approved dimension and providing such shifting does not significantly alter the conceptual integrity of the plan.
 3. Construction of additional or alteration of approved sidewalks, provided that the full intent of pedestrian movement through and around the site is not inhibited thereby.

4. Shifting of, additions to, or changes in species of landscape materials, provided that such change does not reduce the minimum landscape requirements.
 5. Relocation of refuse collection stations.
 6. Internal rearrangement of parking lots and curb cut locations provided such functional rearrangement does not reduce the total number of parking spaces required and further provided that the minimum landscape requirements are maintained and further provided that such rearrangement does not inhibit good traffic flow or circulation.

ARTICLE 94 - SITE PLAN

[Annotation: Entire Article added by amendment, adopted August 9, 1995; effective August 10, 1995 at 12.01am.]

9401. Purpose:

It is recognized by this Ordinance that there is a value to the public in establishing safe and convenient traffic movement to higher density sites, both within the site and in relation to access streets; that there is value in encouraging a harmonious relationship of buildings and uses both within a site and in relation to adjacent uses; further that there are benefits to the public in conserving natural resources. Toward this end, this Ordinance requires site plan review by the Commission under the provisions of a Special Use Permit and provides for the option of site plan review by the administrator.

9402. Site Plan Review:

- A. Every application for a zoning permit shall include a site plan, drawn according to the specifications of this article. (A demand for appeal before the Appeals Board shall include a site plan drawn according to the specifications of this article.) The administrator shall review the site plan prior to issuing a zoning permit, or the administrator shall transmit the site plan to the Commission for their review.
- B. There shall be three levels of site plans, for different complexities of proposed land uses:
 - 1. A Basic Site Plan (Section 9404), for dwellings, additions to dwellings and construction of accessory structures to dwellings. These site plans shall only be subject to review by the Administrator.
 - 2. A Medium Site Plan (Section 9405), for any permitted use --which is not a dwelling, addition to a dwelling, construction of accessory structures to dwelling-- and for any matter before the Appeals Board which would not need a Detailed Site Plan. The Commission shall publish policy for when a Medium Site Plan --not drawn for purposes of an Appeal-- shall be required to be reviewed by the Commission and/or a committee of the Commission, or the Administrator.
 - 3. A Detailed Site Plan (Section 9406), for any Special Use, Planned Unit Development. These site plans shall only be subject to review by the Commission.
- C. Whenever possible site plan review by the administrator and Commission shall be coordinated and done simultaneously with other reviews by the administrator and Commission on the same application.

9403. Optional Sketch Plan Review:

The sketch plan shall be superimposed on an air photo of the parcel or shall be a scaled drawing of the parcel showing the location of existing and proposed parcel, parcel boundaries, all structures, natural features, all improvements, streets, sidewalks, easements and drainage systems. The review shall be informal and advisory only, and not constituting any form of approval or authorization of granting any type of permit. The review shall be done without cost to the applicant, but must be scheduled as an item of business on the Commission's agenda if the sketch plan is to be reviewed by the Commission.

9404. Required Data for a Basic Site Plan:

The Basic Site Plan shall be a sketch, drawn to scale, or superimposed on an air photo, or superimposed on a survey, of the parcel. The following shall be shown on the Basic Site Plan:

9405. Required Data for a Medium Site Plan:

The site plan shall be drawn to scale and shall be on paper which measures at least 8.5 by 11 inches, but not more than 36 by 42 inches. The drawing shall be such that the administrator can readily interpret the site plan, and shall include more than one drawing where required for clarity and shall include the following information, unless specifically waived by the administrator upon the determination that the requirements to be waived are not reasonably related to the proposed use.

- C. Boundary dimensions of natural features such as woodlots, water bodies, wetlands, high risk erosion areas, slopes over 25%, beach, sand dunes, drainage and similar features.

If the area covered by the site plan does not include territory within a Wellhead Protection Overlay Zone a site plan review report prepared by the Manistee County Groundwater Staff Review Group may be submitted at the option of

A. Regulations for decibel measurement of noise originating from private properties. Noise radiating from all properties or buildings, as measured at the boundaries of the property, which is in excess of the dB(A) established for the following districts and times shall constitute prima facie evidence that such noise unreasonably disturbs the comfort, quiet and repose of persons in the area and is therefore in violation of this ordinance:

All such noises in excess of the dB(A) as provided herein shall be prima facie evidence that such noise unreasonably disturbs the comfort, quiet and repose of persons in the area and is therefore in violation of this ordinance.

F. Measurement of noise. All measurements of dB(A) according to subparagraphs A and B of this section shall be made by using a sound level meter of standard design and operated on the dB(A) weight scale, with "slow" meter response.

1. Noise levels occurring during the period of the variance will not constitute a danger to public health; and
2. Compliance with the ordinance would impose an unreasonable hardship on the applicant without equal or greater benefits to the public.

L. In making the determination of granting a variance, the Township Board shall consider:

1. The character and degree of injury to, or interference with, the health and welfare or the reasonable use of property that is caused or threatened to be caused;
