SECTION 307 FLOOD PLAIN OVERLAY DISTRICT

307.01 Findings of Fact. Certain areas of Butler Township, Darke County, Ohio are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety, and general welfare. These flood losses are caused by the cumulative effect of obstructions in flood hazard areas which increase flood heights and velocities and, when inadequately anchored, damage to uses in other areas. Uses that are inadequately floodproofed, elevated, or otherwise protected from flood damage also contribute to the flood loss.

307.02 Purpose. The purpose of the Flood Plain Overlay District is to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

- A. Protect human life and health.
- B. Minimize expenditure of public money for costly flood control projects.
- C. Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public.
- D. Minimize prolonged business interruptions.
- E. Minimize damage to public facilities and utilities such as water and gas mains, electric, telephone, and sewer lines, streets and bridges located in areas of special flood hazard.
- F. Help maintain a stable tax base by providing for the proper use and development of areas of special flood hazard so as to minimize future flood blight areas.
- G. Ensure that those who occupy the areas of special flood hazard assume responsibility for their actions.

307.03 Methods of Reducing Flood Losses. In order to accomplish its purpose, the Flood Plain Overlay District includes methods and provisions for:

- A. Restricting or prohibiting uses which are dangerous to health, safety, and property due to water hazards, or result in damaging increases in flood heights or velocities.
- B. Requiring that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction.
- C. Controlling the alteration of natural floodplains, stream channels, and natural protective barriers which help accommodate or channel flood waters.
- D. Controlling filling, grading, dredging, and other development which may increase flood damage.
- E. Preventing or regulating the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards in other areas.

307.04 Boundaries of Flood Plain Overlay District. The Flood Plain Overlay District shall apply to all areas under the jurisdiction of the Butler Township Zoning Resolution that are areas of special flood hazard as identified by the Flood Insurance Study, Darke County, Ohio, Unincorporated Areas dated January 15, 1982 as prepared and amended by the Federal Emergency Management Agency. This study, with accompanying maps and revisions thereto, is hereby adopted by reference and declared to be a part of

the Butler Township Zoning Resolution. Where detailed studies of the floodway and floodway fringe are not a part of the aforementioned flood insurance study, the following sources of data may be used to determine the necessary elevations for the purposes of this Zoning Resolution:

- A. Corps of Engineers-Flood Plain Information Reports.
- B. U.S. Geological Survey-Flood Prone Quadrangles.
- C. U.S.D.A., Soil Conservation Service-Flood Hazard Analysis Studies and County Soil Surveys (Alluvial Soils).
- D. Ohio Department of Natural Resources-Flood Hazard Reports and Flood Profile Charts.
- E. Known highwater marks from past floods.
- F. Other sources acceptable to the Board of Zoning Appeals.

307.05 Relationship Between Flood Plain Overlay District and Other Zoning Districts. The provisions of the Flood Plain Overlay District shall be applicable to all areas located within its boundaries and shall be supplemental to those of any underlying zoning district. Uses requiring structures or fill shall be permitted only after procedures and standards for conditional uses under Article 10, Section 1002 have also been met.

307.06 Warning and Disclaimer of Liability. The degree of flood protection sought by the provisions of the Flood Plain Overlay District is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes such as ice jams and bridge openings restricted by debris. This overlay does not imply that areas outside the areas of special flood hazard or uses permitted within such areas will be free from flooding or flood damage. The creation of the Flood Plain Overlay District shall not create liability on the part of Butler Township, Darke County, Ohio, or any officer or employee thereof, or the Federal Emergency Management Agency for any flood damage that results from reliance on this Zoning Resolution or any administrative decision lawfully made thereunder.

307.07 Required Development Standards In All Flood Hazard Areas. The following development standards shall be required in all flood hazard areas:

- A. **No Floodway Encroachment.** New construction, substantial improvement to existing structures, and fill shall only be permitted by the Board of Zoning Appeals when it is demonstrated by the applicant that, when combined with all other existing and anticipated development, the proposal shall not increase the water surface elevation of the base flood at all in floodways designated on the Flood Insurance Study maps, nor more than one (1) foot at any other location within the area inundated by the base flood as shown on the Flood Insurance Study maps.
- B. **Anchoring.** All new construction and substantial improvements shall be anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy. Methods of anchoring mobile homes may include, but are not limited to, use of over-the-top or frame ties to ground anchors.
- C. **Construction Materials and Methods.** All new construction and substantial improvements shall be constructed with materials resistant to flood damage, using methods and practices that minimize flood damage. Electrical, heating, ventilation, plumbing, and air conditioning equipment or other service facilities shall be designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

- D. Utilities. All uses utilizing new and replacement water supply systems, sanitary sewerage systems, and/or on-site waste disposal systems shall be designed to minimize or eliminate infiltration of flood waters into such systems in accordance with the Darke County Health Department and/or Ohio EPA, as applicable. All on-site waste disposal systems shall be designed to minimize or eliminate discharge into flood waters and impairment or contamination to them during flooding.

307.08 Required Development Standards In Areas Of Special Flood Hazard Without Base Flood Elevation.

In all areas of special flood hazard identified as "Zone A" on the Flood Insurance Rate Map where base flood elevation data are not available from any source, all new construction and all substantial improvement of any residential, commercial, industrial, or other nonresidential structure shall have the lowest floor, including basement, elevated to at least two (2) feet above the highest adjacent natural grade.

307.09 Required Development Standards In Areas Of Special Flood Hazard With Base Flood Elevation.

In all areas of special flood hazard where base flood elevation data are available from the Flood Insurance Study or from other federal, state, or local sources, all new construction and substantial improvement shall meet the following standards:

- A. Residential Structures. All new residential structures and substantial improvement of any existing residential structure, including mobile homes, shall have the lowest floor, including basement, elevated to at least one (1) foot above the base flood elevation.

- B. Nonresidential Structures. All new nonresidential structures and substantial improvement of any existing nonresidential structure shall have the lowest floor, including basement, elevated to at least one (1) foot above the base flood elevation. In lieu of the elevation requirement, such structure, together with attendant utility and sanitary facilities, shall be required to have floodproofing measures designed consistent with the regional flood protection elevation for the particular area, flood velocities, durations, rate of rise, hydrostatic and hydrodynamic forces and other factors associated with the regulatory flood. The Board of Zoning Appeals shall require that the applicant submit a plan or document certified by a registered professional engineer that the proposed floodproofing measures adequately protect the proposed structure or substantial improvement and are consistent with the base flood elevation and associated flood factors for the particular area.

- 1. Waterproofing. The structure shall be watertight to the level of the base flood elevation with walls substantially impermeable to the passage of water. Such waterproofing may be accomplished by the use of watertight doors, bulkheads, and shutters, or similar methods of construction and the use of paints, membranes, or mortars to reduce seepage of water.

- 2. Structural Features. The structure shall have components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy. Such features may include, but not be limited to the following:

- a. Reinforcement of walls to resist water pressures.
- b. Anchorage to resist flotation and lateral movement.
- c. Addition of mass or weight to structures to resist flotation.

- 3. Mechanical and Systems. The structure shall have its mechanical systems adequately protected from flood hazards and complementary mechanical systems necessary to reduce the flood hazard. Such systems may include, but not be limited to the following:

- a. Pumping facilities or comparable practices for sub-surface drainage systems for buildings to relieve external foundation wall and basement flood pressures
 - b. Installation of pumps to lower water levels in structures
 - c. Location of all electrical equipment, circuits, and installed electrical appliances in a manner which will assure they are not subject to flooding and to provide protection from inundation.
- C. **Storage Facilities.** All storage facilities for chemicals, explosives, flammable liquids or toxic materials which could be hazardous to public health, safety, and welfare shall be stored in a manner which will assure that the facilities are situated at least one (1) foot above the base flood elevation. Non-toxic materials, materials that are buoyant, or items likely to be carried off-site by the base flood shall be stored in a manner to prevent flotation of the materials and/or their containers and escape of such materials off-site.

307.10 Required Development Standards For Accessory Structures. Relief to the elevation or floodproofing requirements in Sections 307.08 and 307.09 may be granted by the Board of Zoning Appeals for accessory structures containing five hundred seventy-six (576) square feet or less gross floor area. Such structures shall not encroach upon any designated floodway and shall meet the following additional standards:

- A. They shall not be used for human habitation.
- B. They shall be designed to have low flood damage potential.
- C. They shall be constructed and placed on the building site so as to offer the minimum resistance to the flow of flood waters.
- D. They shall be firmly anchored to prevent flotation.
- E. Service facilities such as electrical and heating equipment shall be elevated or floodproofed.

SECTION 308 PLANNED RESIDENTIAL DISTRICT REGULATIONS

308.01 Purpose of District. The planned residential district is intended to provide flexibility in the arrangement and design of residential neighborhoods, based upon a unified development plan conceived and carried out for an entire area. Within this district, appropriate and reasonable population is maintained while a variety of dwelling unit types is encouraged. Natural features such as topography, trees, and drainageways are encouraged to remain in their natural state to the degree possible. Such developments are generally characterized by a significant proportion of usable open space and a unified design concept with particular attention devoted to the periphery of the development, the overall objective being the compatibility of the development with its surroundings.

308.02 Minimum Project Area. The minimum land area required for a residential planned development shall be twenty (20) acres.

308.03 Density. Every preliminary plan application for a residential planned unit development shall designate the corresponding residential district or districts which reflect the intended density and types of residential uses for each segment of the site in which residential land uses are to be located. Although the lot design requirements may be waived for the approval of the final plan, the overall gross density which would normally be permitted under the designated residential district or districts must be maintained.

- 308.04 Permitted Uses.** Only those uses which are specified as permitted, accessory, or conditional uses within the designated residential district or districts designated on the preliminary plan may be included within the planned development.
- 308.05 Minimum Development Standards.** The minimum lot area, minimum lot frontage, and yard and maximum lot coverage requirements may be varied to allow for greater creativity in site design and structural design within the residential planned development. However, all spacing between principal structures shall be subject to the approval of the Zoning Commission upon consultations with the Fire Chief.
- 308.06 Height Requirements.** The height of any structure within a residential planned development shall be subject to approval by the Zoning Commission upon consultation with the Fire Chief.
- 308.07 Required Off-Street Parking, Loading, and Drive-Through Spaces.** All accessory off-street parking, loading, and drive-through waiting spaces shall be provided in accordance with Article 6 unless otherwise approved in the plan.
- 308.08 Signs.** All signs within the residential planned unit development shall be in accordance with Article 7 unless otherwise approved in the plan.
- 308.09 Underground Utilities Required.** Underground utilities, including telephone and electrical systems, are required within the limits of all planned developments. Appurtenances to these systems which can be effectively screened may be excepted from this requirement if Butler Township finds that such exemption will not violate the intent or character of the proposed planned unit development.
- 308.10 Required Open Space.** Each residential planned development shall have acreage devoted to common open space which shall be designed for the leisure and recreational use of all residents or users within the planned development and may be designed for the leisure and recreational use of the general public. All common open space shall be in accordance with the following:
- A. The location, shape, size and character of common open space shall be suitable for the planned development in relation to the location, number, and types of dwelling units it is intended to serve. In any case, it shall be highly accessible to all residents or users of the planned development.
 - B. The common open space shall be used for amenity and/or recreational purposes. Any uses and/or buildings authorized for the common open space must be appropriate to the scale and character of the planned unit development in relation to its size, density, expected population, topography, and the type of dwellings.
 - C. The common open space must be suitably improved for its intended use, but common open space containing natural features worthy of preservation may be left unimproved. The buildings, structures, and improvements which are permitted in the common open space must be appropriate to the uses which are authorized for the common open space and must conserve and enhance the amenities of the common open space with regard to its topography and unimproved condition.
 - D. The proposed common open space may be conveyed to a public authority which will agree to maintain the common open space and any buildings, structures or improvements which have been placed on it. All land dedicated to the public must meet the requirements of the appropriate authority as to size, shape, and location. Public utility or other similar easements and right-of-way for water courses or other similar channels are not acceptable for common open space dedication unless such land or right-of-way is usable as a trail or other similar purpose and approved by the authority to which the land is dedicated.

- E. The proposed common open space may be conveyed to the trustees of a Homeowners Association or similar organization formed for the maintenance of the planned development. The common open space may be conveyed by covenants under such an arrangement subject to approval by Butler Township. Such covenants shall restrict the common open space to the uses specified on the final development plan and provide for the maintenance of common open space in a manner which assures its continuing use for its intended purpose.

308.11 Conflict With Other Sections. Because of the special characteristics of planned developments, special provisions governing the development of land for this purpose are required. Whenever there is a conflict or difference between the provisions of this Section and those of the other Articles of this Zoning Resolution, the provisions of this Section shall prevail. Subjects not covered by this section shall be governed by the respective provisions found elsewhere in this Zoning Resolution.

308.12 Ownership and Divisions of Land. No tract of land may be considered for or approved as a planned development unless such tract is under single ownership or evidence of unified control of the entire site is submitted with the application. The landowner of an approved planned development shall not divide and/or transfer parts of such development unless any successor in title has been bound to complete, use, and maintain each such unit in strict conformance with the adopted final master development plan.

308.13 Relationship to the Darke County Subdivision Regulations. The uniqueness of each proposal for a planned development may require that there be modification from the specifications established in the Subdivisions Regulations of Darke County, Ohio. Modifications may be incorporated only with the approval of the Darke County Planning Commission.

308.14 Criteria for Approval of Planned Developments. Before the approval of any Planned Unit Development is granted, the Zoning Commission and Township Trustees shall find that the facts submitted with the application meet the following criteria:

- A. The Planned Development shall be consistent in all respects with the Darke County Land Development Plan.
- B. The Planned Development shall provide a more desirable and more diverse environment than would be possible under strict application of the standard minimum design requirements of other districts provided within this Zoning Resolution.
- C. The Planned Development shall provide a development pattern which preserves and utilizes the natural topography, geologic features, scenic vistas, natural vegetation, and natural drainage patterns of the site.
- D. The Planned Development shall provide an environment of stable character which promotes a harmonious relationship between land uses within the site and a harmonious relationship with surrounding development.
- E. The Planned Development shall promote greater efficiency in the use of land, but shall not impose an undue burden on public services and facilities such as fire and police protection, schools, water supply, and wastewater disposal due to excessive population densities.
- F. The Planned Development shall be accessible from public thoroughfares adequate to accommodate the traffic which will be imposed on them by the proposed development, and the proposed streets and parking areas within the site shall be adequate to serve the proposed arrangement of land uses.
- G. The Planned Development shall provide a more spacious and useful pattern of open space and recreation areas than would normally be required under the strict application of existing zoning and subdivision requirements.

- H. The Planned Development shall be designed in such a way that each individual section of the development, as well as the total development, can exist as an independent section capable of creating an environment of sustained desirability and stability, or that adequate assurance has been provided that such an objective will be attained.

- I. If governmental ownership is planned for common open space or recreational facilities within the Planned Development, its acceptance shall be approved with or prior to the rezoning action. If it is proposed that such open space be owned and/or maintained by any entity other than a governmental authority, copies of the proposed articles of incorporation and by-laws of such entity shall be submitted.

ARTICLE IV SUPPLEMENTARY DISTRICT REGULATIONS

SECTION 400 GENERAL PROVISIONS

400.01 Applicability of Supplementary District Regulations. The supplementary district regulations of this Article are applicable to all zoning districts within Butler Township unless otherwise modified by the requirements of a specific zoning district.

SECTION 405 MAXIMUM HEIGHT REGULATIONS FOR NON-HABITABLE STRUCTURES

405.01 Non-Habitable Structures May Exceed Maximum Height Requirement. Spires, belfries, cupolas, antennas, water tanks, ventilators, chimneys, or other similar appurtenances usually required to be placed above the roof level and not intended for human occupancy may exceed the maximum height requirement for the district in which the property is located, subject to the following provisions:

- A. **Maximum Height Permitted.** The maximum height of such structure shall not exceed fifty (50) feet in total height within any residential district and shall not exceed ninety (90) feet in total height within any other type of district. Any greater overall height than those stated above shall be considered a conditional use and shall require approval by the Board of Zoning Appeals after public hearing.
- B. **Required Setback From Residential Lots.** Structures and/or appurtenances granted an exception shall be set back a distance equal to or greater than its height from any boundary of a residential lot within a residential district.
- C. **Aircraft Hazard Prohibited.** Structures and/or appurtenances shall not be granted an exception to the maximum height regulations where it is determined that a hazard will be created for the safe landing and takeoff of aircraft at an established airport or landing strip, as determined by applicable Federal, State, and local agencies.

SECTION 406 SETBACK REQUIREMENTS FOR CORNER LOTS OR THROUGH LOTS

- 406.01 Setback From Streets.** On a corner lot or through lot, the principal building and all accessory structures shall be required to have the same setback distance from all street right-of-way lines as required for the front yard in the district in which such structures are located.
- 406.02 Rear Yard Required For Corner Lot.** On a corner lot, the principal structure shall be located a distance equal to or greater than the required rear yard setback from at least one (1) lot line not located along a street.

SECTION 407 VISIBILITY AT INTERSECTIONS

- 407.01 Front Yard Height Restrictions.** No fence, wall, hedge, or structure shall be permitted within any required front yard above the height of thirty-six (36) inches.
- 407.02 Height Restrictions At Intersections.** No fence, wall, hedge, fill, or structure shall be located, nor shall any vegetation be allowed to grow on any corner lot so as to create a line-of-sight impediment within one-hundred (100) feet of the intersecting centerlines of any two (2) or more streets. In determining whether a line-of-sight impediment exists, the Zoning Inspector shall measure sight distance at a height of thirty-nine (39) inches above the actual grades of the streets.

SECTION 408 MINIMUM RESIDENTIAL FLOOR AREA

- 408.01 Single-Family and Two-Family Dwellings.** The minimum residential floor area per dwelling unit for single-family and two-family dwellings within Butler Township shall be in accordance with the following table. These requirements shall be applicable to all zoning districts.

SECTION 409 SCREENING REQUIREMENTS

409.01 When Required. Hereafter, no buildings or structures shall be erected, altered or enlarged nor shall land be used for any non-residential use on a lot that adjoins or faces any residential district until a plan for screening has been submitted and approved by the Zoning Inspector or the Board of Zoning Appeals, as appropriate.

409.02 Purpose for Screening. Screening shall be provided for one (1) or more of the following purposes:

- A. A visual barrier to partially or completely obstruct the view of structures or activities in order to minimize or prevent nuisances;
- B. As an acoustic screen to aid in absorbing or deflecting noise; and/or
- C. For the containment of ambient debris and litter.

409.03 Types of Screening Permitted. Screening may be one (1) of the following or a combination of two (2) or more:

- A. A solid masonry wall;
- B. A solidly constructed decorative fence;
- C. A louvered fence;

- E. Landscaped mounding with ground cover.

Such screening shall be of sufficient density or opaqueness to accomplish the purposes for screening previously stated in Section 409.02.

409.04 Location of Screening. Whenever any non-residential use is located upon a lot that abuts a residential zoning district, a visual screening wall, fence, mounds or planting shall be erected or placed along such mutual boundary lines. Such screening shall also be required where a multiple-family building is located upon a lot abutting a single-family residential district.

409.05 Height of Screening. Visual screening walls, fences, mounds and plantings shall be not less than 72 (seventy-two) inches high. The height of screening required in front yards shall be three (3) feet, unless the Zoning Inspector determines that a sight-distance hazard would be created.

409.06 Mounding Specifications. Mounding provided in lieu of or in combination with walls, fences, and/or evergreen plantings shall consist of a strip of land as wide as necessary to obtain a maximum slope of three (3) horizontal to one (1) vertical (angle of repose) for the required height. Mounding shall be planted with a ground cover suitable to prevent erosion.

409.07 Required Depth for Noise Screening. Screening for the purpose of absorbing or deflecting noise shall have a depth of at least fifteen (15) feet of mounding with plantings or ground cover or be a solid masonry wall in combination with decorative plantings.

409.08 Protection and Maintenance of Screening. Whenever required screening is adjacent to parking areas or driveways, such screening shall be protected by bumper blocks, posts or curbing to avoid damage by vehicles. All screening shall be trimmed and maintained in good condition and remain free of all advertising or other signs. Live vegetation used for screening shall receive regular maintenance, including trimming, mowing, and replacement of diseased plant materials.

ARTICLE V SUPPLEMENTARY USE REGULATIONS

SECTION 500 GENERAL PROVISIONS

500.01 Applicability of Supplementary Use Regulations. The supplementary use regulations of this Article are applicable to the specified uses and/or structures.

SECTION 501 HOME OCCUPATIONS

501.01 Limitation on Employees. Not more than one (1) person shall operate a home occupation or be employed thereunder other than a resident of the premises.

501.02 Relation To Dwelling Unit. All home occupations shall be conducted entirely within the dwelling unit, and the use of the dwelling unit for the home occupation shall be clearly incidental and subordinate to its use for residential purposes by its occupants. Not more than twenty-five percent (25%) of the gross floor area of any dwelling unit shall be used for a home occupation.

501.03 Relation To Accessory Buildings. Home occupations shall not be permitted in any accessory building within any district other than an Agricultural District. Any home occupation located within an accessory building exceeding six hundred (600) square feet in floor area shall be subject to review and approval by the Board of Zoning Appeals to insure that the character of the neighborhood is maintained, where applicable.

501.04 Outside Appearance and Signage. There shall be no change in the outside appearance of the building or premises, or other visible evidence of the conduct of such home occupation other than one (1) sign, not exceeding two (2) square feet in area, non-illuminated, and mounted flat against the wall of the building in which the home occupation is located. Home occupations located within an agricultural zoning district may be permitted one (1) freestanding sign with a maximum sign area of eight (8) square feet set back a minimum of ten (10) feet from the street right-of-way.

501.05 Sale of Commodities. There shall be no sale on the premises of commodities not produced as the result of the home occupation.

Not more than one (1) vehicle nor any commercially licensed vehicle larger than a one (1) ton truck shall be used in connection with any home occupation. No traffic shall be generated by such home occupation in greater volume than would normally be expected in the neighborhood, and any need for parking generated by the conduct of such home occupation shall meet the off-street parking requirements as specified in this Zoning Resolution, and shall not be located in a required front yard.

501.07 External Effects. Equipment or processes shall not be used in such home occupation which create noise, vibrations, glare, fumes, odors, or electrical interference detectable off the lot if the occupation is conducted in a single-family residence, or outside the dwelling unit if conducted in other than a single-family residence. In the case of electrical interference, no equipment or process shall be used which creates visual or audible interference in any radio, television receiver off the premises, or cause fluctuations in voltage off the premises.

501.08 Hazardous Material Prohibited. No toxic, explosive, flammable, combustible, corrosive, etiologic, radioactive, or other restricted materials shall be used or stored on the site.

501.09 Hours of Operation. In no case shall a home occupation be open to the public at times earlier than 8:00 a.m. nor later than 10:00 p.m.

501.10 Advertising. No advertisement shall be placed in any media containing the address of the property for

any home occupation located within a residential district.

501.11 Use Guidelines. The Board of Zoning Appeals shall use the following guidelines in determining whether or not to approve a particular request for conducting a home occupation:

- 800.04 Uses.** A conforming use may be expanded, modified, or changed only in such a manner as will comply with the use restrictions and development standards for the zoning district in which the conforming use is located.

SECTION 801 NONCONFORMING LOTS

- 801.01 Nonconforming Lots.** A lawfully existing lot which would be prohibited under this Zoning Resolution by reason of area, width, frontage, or otherwise shall be considered a nonconforming lot. Any change, alteration, enlargement, or reduction of a nonconforming lot of record shall be in accordance with the provisions of Sections 801.02 and 801.03. It is the intent of this Section to permit such nonconforming lot to continue until it is altered to conforming status, but not to encourage its use or alteration outside of the provisions set forth in this Article.
- 801.02 Nonconforming Vacant Lots of Record in Combination.** If two or more lots, or a combination of lots and portions of lots with continuous frontage in single ownership, are of record at the time of passage or amendment of this Zoning Resolution, and if all or part of the lots with no buildings do not meet the requirements established for lot width and area, the lands involved shall be considered to be an undivided parcel for the purpose of this Zoning Resolution. All such lots shall be required to be recombined, as required, to meet the current area and frontage requirements for the required use before a zoning permit may be issued. No portion of said parcel shall be used or sold in a manner which diminishes compliance with lot width and area requirements established by this Zoning Resolution, nor shall any division of any parcel be made which creates a lot with a width or area below the requirements stated in this Zoning Resolution.
- 801.03 Single Nonconforming Lots of Record.** In any zoning district in which a use is permitted, such use may be permitted on any single lot of record at the effective date of adoption or amendment to this Zoning Resolution, notwithstanding the limitations imposed by Section 801.03. Such lot shall be in separate ownership and not of continuous frontage with other lots in the same ownership. This provision shall apply even though such lot fails to meet the requirements for area or width, or both, that are generally applicable in the district. Yard dimensions, parking requirements, and development standards of the applicable zoning district other than those applying to lot area or lot width shall conform to the regulations for the district in which such lot is located. Variance of such development standards shall be obtained only through action of the Board of Zoning Appeals.

SECTION 802 NONCONFORMING STRUCTURES

- 802.01 Continuation.** Any lawfully existing principal or accessory structure which by reason of size, type, location on the lot, or otherwise is in conflict with the applicable development standards of the zoning district in which it is located shall be considered a nonconforming structure. Any change, alteration, enlargement, or reduction of a nonconforming structure shall be in accordance with the provisions of

Sections 802.02 through 802.05. It is the intent of this Zoning Resolution to permit such nonconforming structure to continue until it is removed, but not to encourage its use or expansion outside of the provisions set forth in this Article.

802.02 Structural Alterations. Structural alteration of a nonconforming structure shall be in accordance with the provisions of this Section.

- A. **Must Comply With Development Standards.** Any structural alteration of a nonconforming structure shall be made only in such a manner that such alteration will comply with the development standards of the zoning district in which such nonconforming structure is located.
- B. **No Increase In Nonconformity.** Any structural alteration of a nonconforming structure shall not create any additional nonconformity or increase the degree of existing nonconformity of all or any part of such structure.
- C. **Reduction of Other Standards Prohibited.** The extension or enlargement of a nonconforming structure may not occupy ground space suitable and otherwise available for meeting the required off-street parking, loading, and drive-through waiting requirements of this Zoning Resolution.
- D. **Nonresidential Structures In Residential Zoning Districts.** Any enlargement of a nonconforming nonresidential structure located within a residential zoning district shall require a public hearing using the procedures prescribed for appeals in Article 10, Section 1003. If permitted, enlargements of such nonconforming structures shall only be made on property owned in conjunction with such nonconforming structure at the effective date of this Zoning Resolution or appropriate amendment thereto.
- E. **Residential Buildings In Nonresidential Zoning Districts.** Nonconforming residential buildings in a nonresidential district may be improved, modernized, or enlarged. However, no increase in the number of dwelling units shall be permitted.

802.03 Damage or Destruction. In the event that any nonconforming structure is damaged or destroyed, by any means, to the extent of more than fifty (50) percent of the current replacement cost of the entire structure, such structure shall not be restored unless it thereafter conforms to the development standards for the zoning district in which it is located. When a structure is damaged to the extent of fifty (50) percent or less of the current replacement cost, no repairs or restoration shall be made unless a zoning certificate is obtained and restoration is actually begun within one (1) year after the date of such partial destruction. Such repair or restoration shall not increase the nonconformity that existed prior to the damage.

802.04 Moving. No nonconforming structure shall be moved in whole or in part for any distance whatever, to any other location on the same or any other lot unless the entire structure thereafter conforms to the development standards of the zoning district in which it will be located after being moved.

802.05 Repair and Maintenance. Work may be done on ordinary maintenance and repairs, or on repair or replacement of wall, fixtures, wiring, or plumbing; provided, however, that this paragraph shall not be deemed to authorize any violation of this Article. Nothing in this Zoning Resolution shall be deemed to prevent the strengthening or restoring to a safe condition of a building or other structure, other than a damaged or destroyed building or other structure subject to the provisions of 802.05, in accordance with the order of a public official who is charged with protecting the public safety and who declares such building or other structure to be unsafe and orders its restoration to a safe condition.

802.06 Plans Approved Prior To Effective Date. To avoid undue hardship, nothing in this Zoning Resolution shall be deemed to require a change in the plans, construction, or designated use of any building on which actual construction was lawfully begun prior to the effective date of adoption or appropriate amendment of this Zoning Resolution and upon which actual building construction has been carried on diligently.

SECTION 803 NONCONFORMING USES

- 803.01 Continuation.** Any lawfully existing principal, accessory, or conditional use which is in conflict with the applicable use restrictions of the zoning district in which it is located shall be considered a nonconforming use. Any change, alteration, or enlargement of a nonconforming use shall be in accordance with the provisions of Sections 803.02 through 803.08. It is the intent of this Zoning Resolution to permit such nonconforming use to continue until it is removed, but not to encourage its continuation, expansion, or substitution outside of the provisions set forth in this Article.
- 803.02 Expansion of Use Within A Structure.** A nonconforming use may be expanded throughout any part of a building or other structure that was lawfully and manifestly designed or arranged for such use on the effective date of this Zoning Resolution or appropriate amendment thereto.
- 803.03 Expansion Of Structure.** A building or structure housing a nonconforming use may be extended or enlarged upon the lot of record occupied by such building on the effective date of this Zoning Resolution or amendment thereto, provided the development standards of the zoning district are complied with. Such building or structure may be expanded on to an adjoining property, provided such property was under the same ownership as the lot in question on the effective date of this Zoning Resolution or amendment thereto. Such building may be enlarged or extended to an extent not exceeding twenty-five (25) percent of the gross floor area of such structure or building lawfully existing at the time of the adoption of this Zoning Resolution or appropriate amendment thereto.
- 803.04 Substitution of Use.** The Board of Zoning Appeals may permit the substitution of a nonconforming use within a building or structure lawfully existing at the time of the adoption of this Zoning Resolution, subject to the following conditions:
- A. The Board of Zoning Appeals may permit either an expansion of a nonconforming building or structure, or a substitution of a nonconforming use in such building or structure, but not both.
 - B. The substitution shall not be permitted unless the Board of Zoning Appeals finds that the proposed nonconforming use is equally or more appropriate to the district than the existing nonconforming use.
 - C. Such substitution shall only be permitted after a public hearing in accordance with the procedures prescribed for appeals in Article 10, Section 1003 of this Zoning Resolution.
- 803.05 Damage or Destruction to Structure.** In the event that any building or other structure that is devoted in whole or in part to a lawful non-conforming use is damaged or destroyed, by any means, to such an extent that the cost of restoration to the condition in which it was before such damage or destruction exceeds fifty (50) percent of the current replacement cost of the entire building or other structure, exclusive of foundation, such building or other structure shall not be restored unless such building or other structure and the use thereof shall thereafter conform to the regulations of the district in which it is located. Moreover, even if such damage is fifty (50) percent or less, no repair or restoration shall be made unless a building permit is obtained within one (1) year after the date of such partial destruction, and restoration is actually begun within six (6) months after that.
- 803.06 Moving of Structure.** No structure devoted in whole or in part to a nonconforming use, shall be moved to any other location on the same lot or any other lot unless the entire structure and the use thereof shall thereafter conform to the regulations of the district in which it will be located after being so moved.
- 803.07 Relocation Of Use.** No nonconforming land use shall be relocated, in whole or in part, to any other location on the same or any other lot unless such use thereafter conforms to the regulations or the district in which it is located after being moved.
- 803.08 Discontinuance of Use.** Discontinuance of any nonconforming use of land, a building, or a structure shall be in accordance with the provisions of this Section.

- A. Discontinuance of a Nonconforming Use of Land. In the event that operation of a nonconforming use of land is voluntarily discontinued for a period of two (2) years, such nonconforming use shall not thereafter be reestablished and any subsequent use or occupancy of such land shall conform to the regulations of the district in which it is located.
- B. Discontinuance of a Nonconforming Use of Buildings or Structures. In the event that operation of a nonconforming use of all or part of a building or other structure is voluntarily discontinued for a period of two (2) years, such nonconforming use shall not thereafter be reestablished, and any subsequent use or occupancy of such building or other structure shall conform to the regulations of the district in which it is located.
- C. Nonconforming Accessory Uses. No nonconforming accessory use shall continue after the principal use to which it is accessory has been discontinued.

- B. Variances. Where an applicant has provided sufficient evidence to warrant the granting of a variance, to authorize such variances from the terms of this Zoning Resolution as will not be contrary to the public interest, where, owing to special conditions, a literal enforcement of this Zoning Resolution will result in unnecessary hardship, and so that the spirit of this Zoning Resolution shall be observed and substantial justice done. The consideration of such variances shall be in accordance with Article 10, Section 1003.

- C. Conditional Use Permits. To grant conditional use permits as specified in Article 10, Section 1002, and such additional safeguards as will uphold the intent of the Zoning Resolution.

1001.01 Zoning Certificate Required. No person shall change any use of land, locate, erect, construct, reconstruct, enlarge or structurally alter any building or structure within Butler Township, Darke County, Ohio without first obtaining a zoning certificate. No zoning certificate shall be issued unless the plans for the proposed building or structure or use of land fully comply with the provisions of this Zoning Resolution, unless the Zoning Inspector receives a written order from the Board of Zoning Appeals deciding an appeal, a variance, or conditional use. A zoning certificate shall be required for all residential structures, all principal structures and uses, all accessory structures unless otherwise specified, all specified accessory uses, and all temporary uses. A zoning certificate shall not be required for the use of land for agricultural purposes, for buildings or structures exclusively used for agricultural purposes, or for structures required in the provision of essential services by a public utility.

If the application is approved, the Zoning Inspector shall issue a zoning certificate. One (1) copy of the application shall be returned to the applicant by the Zoning Inspector after he/she shall have marked such copy either as approved or disapproved and attested to same by his signature on such copy. One (1) copy of the application similarly marked shall be retained by the Zoning Inspector and filed. After the Zoning Inspector issues a zoning certificate, he/she shall issue a placard to be posted in a conspicuous place on the property in question, attesting to the fact that the use or alteration is in conformance with the provisions of this Zoning Resolution.

1001.04 Required Coordination With ODOT. In the event an application involves land within three hundred (300) feet of the centerline of a proposed new highway or a highway for which changes are proposed as described in the certification of local officials by the Director of the Ohio Department of Transportation or any land within a radius of five hundred (500) feet from the point of intersection of said centerline with any public road or highway, the Zoning Inspector shall require a third application for a Zoning Permit and send it to the Director of the Ohio Department of Transportation by registered mail for review. If the Director of the Ohio Department of Transportation notifies the Zoning Inspector that he shall proceed to acquire the land needed, then the Zoning Inspector shall refuse to issue the zoning certificate. If the Director of the Ohio Department of Transportation notifies the Zoning Inspector that acquisition at this time is not in the public interest or upon the expiration of the one hundred twenty (120) day period or any extension thereof agreed upon by the Director of the Ohio Department of Transportation and the property owner, the Zoning Inspector shall, if the application is in conformance with all provisions of this Zoning Resolution, issue the zoning certificate.

SECTION 1002 CONDITIONAL USE PERMITS

1002.01 Conditional Use Permit Required. As applicable to any use listed as a conditional use within a zoning district, no person shall change any use of land, locate, erect, construct, reconstruct, enlarge or structurally alter any building or structure within Butler Township, Darke County, Ohio without first having a conditional use permit granted by the Board of Zoning Appeals.

The notice shall set forth the time and place of the public hearing, and the nature of the proposed conditional use. Before holding the public hearing, written notice of such hearing shall be mailed by the Chair of the Board of Zoning Appeals, by first class mail, at least ten (10) days before the day of the hearing to all parties in interest. The notice shall contain the same information as required of notices published in newspapers. Within thirty (30) days after the hearing, the Board of Zoning Appeals shall either approve, approve with supplementary conditions, or disapprove the application as presented. If the application is disapproved by the Board of Zoning Appeals, the applicant may seek relief through the Court of Common Pleas.

1002.04 Approval of Conditional Uses. The burden of proof for granting a conditional use permit shall rest with the applicant. In granting any conditional use permit, the Board of Zoning Appeals may prescribe such conditions and restrictions as may be necessary to comply with the standards in this Section and the intent purpose of this Zoning Resolution. Violation of such conditions and restrictions, when made part of the terms under which the conditional use is granted, shall be deemed a violation of this Zoning Resolution and punishable under Article 10, Section 1005. Under no circumstances shall the Board of Zoning Appeals authorize a conditional use to allow a use prohibited expressly or by implication within the zoning district in which the property in question is located.

1002.05 Conditional Use Standards. Conditional uses may be permitted provided that such uses shall be found to comply with the following standards and all other applicable requirements as set forth in this Zoning Resolution:

- A. The use is so designed, located and proposed to be operated so that the public health, safety, morals and general welfare will be protected.
- B. The use will not result in the destruction, loss or damage of a natural, scenic, or historic feature of major importance.
- C. The use is operated in a manner that will not cause pollution of either underground water or surface water and will not have a detrimental impact to the underground water supply of the area.
- D. The use will be designed, constructed, operated, and maintained so that it shall not cause substantial injury to the value of the property in the area or neighborhood where it is to be located.
- E. The use shall be compatible with adjoining development and the proposed character of the zoning district where it is to be located.
- F. The use will be served adequately by essential public facilities and services such as highways, streets, police and fire protection, drainage structures, refuse disposal, water and sewers, and schools, or that the persons or agencies responsible for the establishment of the proposed use shall be able to provide any such services adequately.
- G. The use will not create excessive additional requirements at public cost for public facilities and services and will not be detrimental to the economic welfare of the community.

- H. Adequate landscaping and screening are provided, as required.
- I. Adequate off-street parking, loading, and/or waiting spaces are provided, and ingress and egress is so designed as to cause minimum interference with traffic on abutting streets.
- J. The use conforms with all applicable regulations governing the district in which it is located, except as may otherwise be determined for planned unit development.
- K. The use is compatible with the standards, objectives, and policies of the Darke County Land Development Plan.

- M. Any other supplementary requirements as prescribed by the Board of Zoning Appeals.

1002.06 Expiration Of Conditional Use Permits. A conditional use permit shall be deemed to authorize only one (1) particular conditional use. The conditional use permit shall automatically expire if, for any reason, the conditional use shall cease for more than six (6) months, or construction is not begun within the amount of time indicated on the conditional use permit.

SECTION 1003 APPEALS AND VARIANCES

1003.01 Appeals. Appeals to the Board of Zoning Appeals concerning interpretation or administration of this Zoning Resolution may be taken by any person aggrieved or by any officer or bureau of Butler Township affected by any decision of the Zoning Inspector. Such appeal shall be taken within twenty (20) days after the decision by filing, with the Zoning Inspector and with the Board of Zoning Appeals, a notice of appeal specifying the grounds upon which the appeal is being taken. The Zoning Inspector shall transmit to the Board of Zoning Appeals all the papers constituting the record upon which the action appealed was taken.

1003.02 Stay of Proceedings. An appeal stays all proceeding in furtherance of the action appealed from, unless the Zoning Inspector from whom the appeal is taken certifies to the Board of Zoning Appeals after the notice of appeal is filed with him, that by reason of facts stated in the application, a stay would, in his/her opinion, cause imminent peril to life and property. In such case, proceedings shall not be stayed other than by a restraining order which may be granted by the Board of Zoning Appeals or by a court of record on application, on notice to the Zoning Inspector from whom the appeal is taken on due cause shown.

1003.03 Variances. The Board of Zoning Appeals may authorize, upon appeal in specific cases, such variance from the terms of this Zoning Resolution as will not be contrary to the public interest or the intent of this Zoning Resolution where, owing to special conditions, a literal enforcement of the provisions of this Zoning Resolution would result in unnecessary hardship, or in the case of area variances only, practical difficulties. No non-conforming use of neighboring lands, structures, or buildings in the same district and no permitted or non-conforming use of lands, structures, or buildings in other districts shall be considered grounds for issuance of a variance.

1003.04 Application. A variance from the terms of this Zoning Resolution shall not be granted by the Board of Zoning Appeals unless the applicant has provided sufficient evidence to warrant the granting of a variance, and a written application for a variance is submitted to the Zoning Inspector and the Board of Zoning Appeals containing, at a minimum, the following information:

- A. Name, address, and telephone number of applicant.
- B. Legal description of the property.

- C. Description of nature of variance requested.
- D. A narrative statement demonstrating to the satisfaction of the Board of Zoning Appeals that the requested variance conforms to the standards set forth in Section 1003.05.
- E. A fee as established by the Township Trustees.

1003.05 Standards For Granting Variances. Variances may be granted provided that such uses shall be found to comply with the following standards:

- A. Because of the particular physical surroundings, shape, or topographical conditions of the specific property involved, a particular hardship to the owner would result, as distinguished from a mere inconvenience if the strict letter of this Zoning Resolution were to be carried out.
- B. The conditions upon which the application for variance is based are unique to the property for which the variance is sought, and are not applicable, generally, to other property in the same zoning district.
- C. The purpose of the variance is not based exclusively upon a desire to increase financial gain.
- D. The alleged difficulty or hardship is caused by strict interpretation of this Zoning Resolution and has not been created by any persons presently having an interest in the property.
- E. The granting of the variance will not be detrimental to the public welfare or injurious to other property or improvements in the neighborhood in which the property is located.
- F. The proposed variance will not impair an adequate supply of light and air to adjacent property, or substantially increase the congestion of the public streets, or increase the danger of fire, or endanger the public safety, or substantially diminish or impair property values within the neighborhood.

1003.06 Granting of Variances. Variances shall not be granted on the grounds of convenience or profit, but only where strict application of the provisions of this Zoning Resolution would result in unnecessary hardship. The burden of proof for granting a variance shall rest with the applicant. In granting any appeal or variance, the Board of Zoning Appeals may prescribe such conditions and restrictions as may be necessary to comply with the standards in this Section and the intent purpose of this Zoning Resolution. Violation of such conditions and restrictions, when made part of the terms under which the appeal or variance is granted, shall be deemed a violation of this Zoning Resolution and punishable under Article 10, Section 1005. Under no circumstances shall the Board of Zoning Appeals grant an appeal or variance to allow a use prohibited expressly or by implication in the zoning district in which the property in question is located.

1003.07 Processing Appeals and Variances. The Board of Zoning Appeals shall hold a public hearing within twenty (20) days after the receipt of an application for an appeal or variance from the Zoning Inspector or an applicant.

- A. **Published Notice.** Before holding the required public hearing, notice of such hearing shall be given in one or more newspapers of general circulation within Butler Township at least ten (10) days before the date of said hearing. The notice shall set forth the time and place of the public hearing and the nature of the proposed appeal or variance.
