1, The location and planning of the mobile home site and the amount, arrangement and treatment of open space shall be designed to ensure a satisfactory living environment and shall be carried out in consideration of property adjacent to the area included in the plan and insure that such adjacent property will not be adversely affected.

To this end there shall be established and maintained an open space landscaped buffer within the mobile home park along its exterior boundaries. This buffer shall not be less than forty (40) feet or the required front yard, whichever is greater, along the front lot line, or less than fifty (50) feet along any other line, except that where topography or other physical features of the tract of its relation to surrounding property may make complete compliance with the buffer requirements, as prescribed herein, unnecessary or undesirable, the Symmes Township Zoning Commission may consider the recommendation of the Regional Planning Commission, may modify such requirements to the extent warranted by such physical conditions, provided the surrounding property and

the public welfare are adequately protected, and areas not used for access, parking circulation, building and service shall be completely and permanently landscaped and the entire site maintained in good condition. The buffer required herein shall be maintained as open space and landscaping in its entirety, and no areas used for access, parking, circulation, building or service or other accessories of the mobile home park shall be located within any part of such buffer. Recommendations of the Regional Planning Commission are subject to the approval of the Symmes Township Zoning Commission.

2. The number of mobile homes shall not exceed seven (7) such units per net usable acre of the site. The net usable acreage shall be deemed to be the total area of the site, excluding any public street right-of-way and excluding the open space buffer required in Section 99.4(1).
3. All mobile homes, accessory buildings and uses, including the recreation areas required herein, shall be located within the area determined and defined as the net usable area.
4. Permitted accessory buildings and uses shall include management offices, laundry facilities, recreation areas and, where specifically approved as a part of the park plan, other recreation facilities and the sale of convenience goods and services exclusively for and to occupants of the mobile home park.
5. Every mobile home park shall provide one or more recreation areas easily accessible to all residents of the park. The aggregate size of such areas shall be not less than one hundred (100) square feet for each lot, and no individual recreation areas shall be less than three thousand (3000) square feet. Such recreation areas shall be graded and arranged and provided with appropriate equipment for full recreational use of the area. No such recreation area shall be located in any part of the buffer.
6. Each mobile home park shall abut and have access to a public street, and each mobile home lot shall have direct access to the private internal road system, either by direct frontage or by means of a ten (10) foot, hard surfaced driveway. Such internal road system shall be constructed to provide a permanent pavement of at least twenty-six (26) feet, including curbs and gutters. Off-street parking spaces shall be provided in the ratio of two (2) spaces for each mobile home lot; such spaces shall be within two hundred (200) feet from the mobile home or homes served. No parking space shall be located within any part of the buffer.
7. A common walk system shall be provided and maintained between locations where pedestrian traffic is concentrated, and all mobile home stands shall be connected by walks to the common walk system, to the parking spaces to the paved streets and to all service buildings.
8. Each mobile home stand shall be equipped with a concrete slab or with concrete ribbons of adequate thickness and size to support the mobile home load during all seasons. Where concrete ribbons are used, the area between such ribbons shall be filled with crushed rock.
9. Each mobile home park shall be adequately lighted for safety at night, all such lights shall be so located and shielded to prevent direct illumination of any area outside the park.

10. Each mobile home park shall be provided with public water supply and a water distribution system installed in accordance with County specifications. Where a public sanitary sewer is reasonably accessible, the park shall be provided with sanitary sewerage connected thereto, including a lateral connection to each mobile home lot, subject to the review and approval of the Metropolitan Sewer District, the Hamilton County General Health District and the State Department of Health. Where a public sanitary sewer is not available and not reasonably accessible in the combined judgment of the Regional Planning Commission and the Metropolitan Sewer District, an alternate means of sewage disposal, such as a community sewage treatment plan may be considered, subject to review and approval of officials having jurisdiction. An individual sewage disposal system shall not be permitted.

Each park shall be graded and drained to prevent the standing of storm water and the method of drainage, including treatment of both paved and unpaved areas shall be subject to approval of the Hamilton County Public Works. (STT Res. Z9705 eff. Dec. 4, 1997)

Sec. 99.5 **Additional Requirements:** In addition to the foregoing, the Symmes Township Zoning Commission may impose such other conditions, requirements or limitations concerning the design, development and operation of such mobile home park as it may deem necessary for the protection of adjacent properties and the public interest. The Symmes Township Zoning Commission may consider the recommendation of the Regional Planning Commission.

Sec. 99.6 **Enlargement:** Any enlargement or extension of an existing mobile home park shall be treated as if it were a new establishment and shall be subject to the provisions of Section 99.2 and the other provisions of this Article. No enlargement or extension of a mobile home park shall be permitted unless the existing park is made to conform substantially with all the requirements for new construction of such establishment.

"EF" EXCAVATION AND LANDFILL DISTRICT

Sec. 125 In recognition of the deposits of sand, gravel and other minerals in Symmes Township, Hamilton County and the need therefor as well as the need for proper and sanitary disposal of solid wastes, the "EF" Excavation and Landfill District is hereby established. Such district shall be delineated and the operations therein controlled to permit extraction of the materials or the filling of the land in a manner compatible with and not adversely affecting other uses of land in the surrounding area.

Sec. 126 **Use Regulations:** Within the "EF" Excavation and Landfill Districts, a building or premises shall be used only for the following purposes:

1. Agriculture
2. Excavation of sand, gravel and other minerals
3. Disposal of solid waste
4. Location of temporary processing plant or equipment for the extracting, processing and stock piling of sand and gravel, which plant or equipment shall be removed within a period of four (4) months following cessation of the operation. (STT Res. Z9705 eff. Dec. 4, 1997)

Sec. 127 **Required Conditions:** The following standards and conditions shall be complied with in the extraction of sand, gravel and other minerals and in disposal of solid wastes in the "EF" Excavation and Landfill District.

1. All equipment used in the operation shall be placed and operated in a manner to minimized noise, vibration and dust. All access ways or roads within the premises shall be maintained in a dust-free condition through surfacing or such other treatment as may be necessary.
2. No excavation of gravel or sand or other materials shall be permitted nearer than fifty (50) feet to the boundary of the "EF" Excavation and Landfill District, and the operation shall be screened by the mounding of the removed topsoil and other overburden around the extraction area to hide objectionable views from adjacent roads and other properties and to deflect and reduce the noise. The location and height of such screening shall be shown on the plans for the operation and restoration of the area submitted for review by the Symmes Township Zoning Commission and Ohio Department of Natural Resources.
3. In order to insure adequate lateral support, all sand and gravel excavations shall be located at least fifty (50) feet and backfilled to at least one hundred (100) feet from the right-of-way line of any existing or platted street, road, highway or railway, except that such excavation may be permitted within these limits to the point of reducing the ground elevation to the grade of the existing or platted street, road or highway where officially approved by the Hamilton County Engineer.
4. No excavation of sand and gravel shall be made from the banks or beds of the Little Miami River. No excavation shall be made from the banks or beds of any other major stream, unless approved by the Hamilton County Engineer and, where appropriate, by the Miami Conservancy District or the U.S. Corps of Engineers, with the finding that such excavation will not impair the lateral support needed for permanent stream levees.

5. All excavations of gravel or sand shall either be made to a depth of at least five (5) feet below the water-producing depth or shall be graded or backfilled with non-noxious and non-inflammable solids to assure (a) that the excavated area will not collect and retain stagnant water or (b) that the graded or backfilled surface will create a gently rolling topography to minimize erosion by wind and rain and substantially conform with the contours of the surrounding area. The banks of all excavations not backfilled shall be sloped to the water line at a grade of not less than three (3) feet horizontal to one (1) foot vertical and such banks shall be sodded or surfaced with at least six (6") inches of suitable soil and seeded with grass. Soil banks shall be graded to a level suiting the existing terrain and planted with trees, shrubs, legumes or grasses where re-vegetation is possible. Where flood water exists, soil banks shall be high enough to prevent overflow of water in the gravel pits and shall be sloped, graded and seeded as herein prescribed.

6. All sanitary landfills shall be in accordance with the provisions of the Ohio Sanitary Code and shall be subject to approval of the Ohio Environmental Protection Agency and the Hamilton County General Health District. (STT Res. Z9705 eff. Dec. 4, 1997)

Sec. 128

Restoration Requirements: In order to avoid the creation of unusable land after the excavation or landfill operation is completed, to permit, instead, continued use of the land for a purpose in keeping with the Township's overall land use plan, to avoid health and safety hazards from open pits, stagnant water and other adverse land features, and to prevent the depreciation of other property and property values, a plan shall be prepared for reclamation of the area, as required by Chapter 1514 of the Ohio Revised Code and submitted to the Symmes Township Zoning Commission. Such plan shall include a statement of intended future uses of the area in keeping with the aforesaid Township Land Use Plan and shall show the approximate sequence in which the excavation or landfill and reclamation measures are to occur, the approximate timing of the reclamation of the various parts of the area and the measures to be undertaken to prepare the site adequately for its intended future use or uses in keeping with the Land Use Plan and to comply with all the other mining and reclamation requirements of Chapter 1514 of the Ohio Revised Code.

Sec. 129

Before the beginning of any operation in the "EF" Excavation and Landfill District, the plan for restoration of the area shall be reviewed and approved by the Symmes Township Zoning Commission and in the case of a sanitary landfill, such plan shall likewise be reviewed and approved by the Hamilton County General Health District. Such approval by the Symmes Township Zoning Commission and/or the County Sanitary Engineer is in addition to the approval required by the Ohio Department of Natural Resources, Division of Reclamation, with respect to surface mining and the Ohio Environmental Protection Agency with respect to sanitary landfills. (STT Res. Z9705 eff. Dec. 4, 1997)

Sec. 130

Additional Requirements: In addition to the requirements set forth in this article, uses permitted in the "EF" Excavation and Landfill District shall conform to the other requirements of the Resolution, including Article XIV, Article XXXI, and Article XXXII. (STT Res. Z9705 eff. Dec. 4, 1997)

- Sec. 145.1-1 Exemption. Vehicular use areas containing less than twenty (20) parking spaces.
- Sec. 145.1-2 Alteration or expansion. Where a vehicular use area is altered or expanded and thereby contains twenty (20) or more contiguous parking spaces, landscaping for the entire area shall be provided and not merely to the extent of its expansion.
- Sec. 145.2 The total landscaping required in vehicular use areas is twenty-two (22) square feet per parking space. Interior and streetscape landscaping count toward the minimum square feet of landscaping required per parking place.
- Sec. 145.3 Interior landscaping shall comply with the following standards:
- (a) Design. Landscape areas should be peninsular or island types.
 - (b) Maximum Spacing. Parking spaces must be within one hundred twenty-five (125) feet of a landscaped area.
 - (c) Minimum Area. The minimum landscape area shall be one hundred (100) square feet.
 - (d) Surface. Any landscape area provided under this Section shall not contain bare soil. Any ground area shall be covered with stones, mulch, vegetative ground cover, or other surface permeable by water.
 - (e) Natural or landscaped detention basins may count toward minimum square footage landscaping requirements when the basins are in the front or side yards.
 - (f) Traffic Visibility. No landscaping shall obscure visibility at vehicular intersections with the parking area or other areas where clear visibility is necessary to assure safe circulation. Where safe visibility is impaired, canopy trees shall have branches removed from the trunk at least five (5) feet above the ground and shrubs or groundcover shall not exceed two (2) feet in height. Evergreen trees and understory trees that would impair visibility for safe circulation shall not be planted in these areas.
 - (g) No interior landscaping area shall be less than ten (10) feet by ten (10) feet.
- Sec. 145.4 Determination of Interior Landscape Requirements. The Landscape Requirements shall be computed as follows:
- (a) Interior Landscape Area Requirements. Determine the landscape area by multiplying the Landscape Area Requirement of twenty-two (22) square feet per parking space by the total number of parking spaces on the lot.
 - (b) Planting Requirements. To determine the minimum number of canopy trees, use the rate of one (1) canopy tree for each ten (10) parking spaces for retail uses and two (2) canopy trees for each ten (10) parking spaces for non-retail uses. Any fractional number of trees should be calculated to the next highest whole number.
- To determine the total number of required shrubs, multiply the total number of required canopy trees by three (3). One (1) canopy tree may be substituted for three (3) shrubs. Trees and shrubs do not have to be equally spaced, but may be grouped. (STT Res. Z9705 eff. Dec. 4, 1997)

- Sec. 145.5 Overlap. When any portion of the parcel is subject to more than one set of landscape or buffer requirements as set forth in this or any other Article, the most stringent requirement shall control. The most stringent requirements shall be defined as those which require the highest fence, wall or screen or, if no fence, wall or screen is required, the requirements with the greatest quantity of landscaping.
- Sec. 145.6 Credit. Existing trees and shrubs, fences, walls or berms on a parcel may be used to meet the requirements if they meet the standards established in this Section.
- Sec. 145.7 Plant Installation and Maintenance Standards. All new plant material as part of the requirements for this Section shall be in accordance with Article XXXII, Sec. 329.
- Sec. 145.8 Modifications. In the event that the unusual topography or elevation of a development site, the size of the parcel to be developed, or the presence of existing buffers on adjacent developed property would make strict adherence to the requirements of this Section serve no meaningful purpose or would make it physically impossible to install and maintain the required buffer, the Symmes Township Zoning Commission may, upon proper application by the property owner, and upon making findings of fact, modify the requirements of this Section provided the existing or resulting boundary features of the development site comply with the spirit and intent of this Section 145, and any other Article.
- Sec. 146 **Outdoor Lighting.** The following restrictions shall apply to any outdoor lighting located in any district on parcels where there are parking spaces for five (5) or more vehicles.
- Sec. 146.1 All outdoor lighting shall be cutoff fixtures and designed, located, and mounted at heights no greater than fifteen (15) feet above grade for lights. Outdoor lighting requirements are illustrated in Figure 14D.
- Sec. 146.2 All outdoor lighting shall be designed and located with a maximum illumination of 0.5 foot candles at the property line when abutting a residential use or Residence District other than the "O" and "E" Residence Districts.
- Sec. 146.3 All outdoor lighting for non-residential uses shall be located, screened, or shielded so that adjacent lots located in Residence Districts are not directly illuminated.
- Sec. 146.4 No outdoor lighting shall be of such an intensity or color distortion as to cause glare or to impair the vision of drivers or pedestrians.
- Sec. 146.5 The Township Zoning Commission shall consider the following criteria in the evaluation of lighting plans:
 (a) Pole Height;
 (b) Type of Luminaire;
 (c) Site Coverage - average maintained;
 (d) Uniformity: (1) Maximum:Minimum (2) Average:Minimum; and
 (e) Intensity at Property Line
- Sec. 146.6 Outdoor lighting need not comply with the yard requirements of this Resolution, except that no such light shall obstruct sight triangles at public street intersections.

NON-CONFORMING USES**

- Sec. 151 The lawful use of any dwelling, building or structure and of any land or premises as existing and lawful at the time of enactment of this Resolution or amendment thereto, may be continued although such use does not conform with the provisions of this Resolution or Amendment. If no structural alterations are made, a non-conforming use of a building may be changed to another non-conforming use of the same or of a more restricted classification. Whenever a non-conforming use has been changed to a more restricted use or to a conforming use, such use shall not thereafter be changed to a less restricted use.
- Sec. 152 Whenever the use of any dwelling building or structure and of any land or premises becomes non-conforming through an Amendment of this Resolution or Maps, such use may be continued and, if no structural alterations are made, it may be changed to another non-conforming use of the same or of a more restricted classification.
- Sec. 153 In the event that a non-conforming use of any dwelling, building or structure and of any land or premises is voluntarily discontinued for two (2) years or more, any future use thereof shall be in conformity with the provisions of this Resolution.
- Sec. 154 Except as hereinafter provided in Article XVIII, no existing building or premises devoted to a use not permitted by this Resolution in the District in which such building or premises is located, except when required to do so by law or order, shall be enlarged, extended, reconstructed, or structurally altered, unless the use thereof is changed to a use permitted in the District in which such building or premises is located.
- Sec. 155 When a building, the use of which does not conform to the provisions of this Resolution, is damaged by fire, explosion, Act of God, or the public enemy, to the extent of more than sixty percent (60%) of its reproduction value, it shall not be restored, unless the restoration of such use shall have been authorized by the Board in the manner provided in Article XVIII. (STT Res. Z9705 eff. Dec. 4, 1997)
- Sec. 156 Nothing in this Resolution shall be interpreted as authorization for or approval of the continuance of the use of any activity, land, building or premises in violation of zoning regulations in effect at the time such use was begun.

**ARTICLE XVI
COMMUNITY UNIT PLAN**

- Sec. 160 The purpose of the CUP Overlay District is to encourage the efficient allocation of private lots, multi-family dwelling units, common areas and nonresidential uses as well as greater efficiency in public and utility services by accommodating developments which are planned so as to integrate residential use with collateral uses, and in which lot size, setback lines, yard areas, and dwelling types may be varied and modified to achieve particular design objectives and make provision for open space, common areas utilities, public improvements and collateral uses.
- Sec. 161 The owner or owners of any tract of land may submit to the Symmes Township Zoning Commission a plan for the use and development of the tract of land for residential and related purposes as hereinafter provided in Section 161.3. Such plan for development of the area shall be referred to the Regional Planning Commission for study and report. The plan together with a report stating the findings and recommendations of the Regional Planning Commission shall be filed with the Symmes Township Zoning Commission. The report shall state the reasons for recommendation and shall include specific evidence and facts showing the proposed community unit plan meets the following conditions:
- Sec. 161.1 That the location and planning of building sites and the amount, arrangement and treatment of open space will ensure a satisfactory living environment and will be carried out in consideration of property adjacent to the area included in the plan and ensure that such adjacent property will not be adversely affected.
- Sec. 161.2 That the plan is consistent with the objectives of this Article to further the best use of the land in relation to its size, configuration, location and physiography, and to produce a residential environment of sustained desirability.
- Sec. 161.3 That the buildings shall be used only for single-family detached dwellings and such accessory buildings and uses customarily incident to such use if the area of the Community Unit Plan is less than ten (10) acres, or only for detached and attached single family, two family or multiple dwellings, or other residentially related activities and customary accessory uses if the area of the Community Unit Plan is more than ten (10) acres in area and if approved by the Board of Trustees for such use. In the case of a Community Unit Plan of fifty (50) acres or more one (1) area may be approved in such plan as a shopping center for parking and commercial buildings and uses as regulated in the "E" Retail Business District not to exceed one (1) acre for each hundred (100) lots or dwelling units or fraction thereof.
- Sec. 161.3-1 Where the topography or other physical features of the tract or its relation to surrounding property make complete compliance with the minimum area requirements, as prescribed in Section 161.3, unnecessary or undesirable, the Symmes Township Zoning Commission may modify such requirements to the extent warranted by such physical conditions provided the surrounding property and the public welfare are adequately protected.
- Sec. 161.4 That the average lot area per family contained in the site, excluding rights-of-way and access easements, will not be less than the lot per family required in the District in which the development is located.
- Sec. 162 Following review by the Regional Planning Commission, the plan shall then be referred to the Symmes Township Zoning Commission for public hearing and report to the

Symmes Township Trustees, as provided for amendments or supplements to the Zoning Resolution in accordance with Section 519.12 of the Ohio Revised Code.

Sec. 163 If the Symmes Township Trustees approved the plan, then zoning certificates may be issued even though the use of land, the location of the buildings to be erected in the area, and the yards and open spaces contemplated by the plan do not conform in all respects to the District Regulations of the District in which it is located. The Trustees may also by the same procedure, authorize the revision or remodeling of any existing Community Unity Plan that does not conform in all respect with the District Regulations of this Resolution.

Sec. 163.1 No building permit shall be issued for actual construction of any development that does not conform in all respects with the Rules and Regulations of the Hamilton County Regional Planning Commission for subdivision of land and the underlying Residence District regulations in which the site is located until and unless variations of said regulations are granted as part of a development plan as defined in Section 31.3-55 and that a Final Development Plan shall have been reviewed and approved by the Symmes Township Zoning Commission with a determination that such plan is consistent with the approved development plan and the purposes and intent of this Article. The Symmes Township Zoning Commission may approve variations in the Final Development Plan not in violation of any standards and requirements prescribed in this Article, and provided that the variations remain completely in harmony with the approved plan and within the spirit of the Resolution.

A building permit may be issued for actual construction of any development that conforms in all respects with the Rules and Regulations of the Hamilton County Regional Planning Commission for subdivision of land and the underlying residence district regulations in which the site is located.

No Zoning Certificates shall be issues for actual construction until and unless a Final Development Plan, as defined in Section 31.22, shall have been reviewed and approved by the Symmes Township Zoning Commission with a determination that such plan is consistent with the approved plan and the purposes and intent of this Article. The Symmes Township Zoning Commission may approve variations in the Final Development Plan not in violation of any standards and requirements prescribed in this Article, provided that the variations remain in harmony with the approved plan and within the spirit of the Resolution. The Symmes Township Zoning Commission may take into consideration recommendations of the Regional Planning Commission relative to such variations. (STT Res. Z9705 eff. Dec. 4, 1997)

Sec. 164 Amendment of the underlying Residence District Map may be initiated coincidentally with the Community Unit Plan Overly District in accordance with this Article. In this case, the application for amendment of the zoning classification and the plan for the use and development of the tract of land may be considered together and the hearings and recommendations therefor may be combined.

Application may be filed for Amendment of the District Map coincidentally with the submitting of a Community Unit Plan in accordance with this Article. In this case, the application for Amendment of the zoning classification and the plan for the use and development of the tract of land may be considered together and the hearings and recommendations therefor may be combined. When such amendment and plan are combined, however, any approval shall be conditioned on carrying out the plan, and the new zoning classification shall be void and shall revert to the district in which the tract was classified before the approved plan unless construction begins within two (2) years after the date of approval of the Symmes Township Trustees.

Sec. 313

Regulations Protecting Free Speech on Signs

(STT Res. Z0501 eff. May 5, 2005)

Sec. 313.1-1

Purpose. It is not the intent of Symmes Township to infringe on the rights of property owners and occupiers to display messages protected by the First Amendment of the U.S. Constitution. Therefore, the purpose of these regulations include the intention to clarify the regulations and to remove any doubt that it is the public's right to receive and display Free Speech Messages, including, but not limited to, religious, political, economic, social and philosophical messages subject, however, to reasonable regulations to assure safety and minimize visual blight. It is the further purpose of these regulations to affirm that an expedient appeal process exists that addresses these First Amendment concerns.

Sec. 313.1-2

Definition. For purposes of Section 313, "Free Speech Message" shall mean any message that is not intended to convey a commercial message. "Free Speech Messages" include but are not limited to, religious, political, economic, social and philosophical messages. "Commercial message" means any message intended to call attention to a business or promote the sale of any goods or services.

- Sec. 313.2 **Conflict with Existing Provisions.** In furtherance of the purpose of this Section, if there is any conflict between the provisions of Sections 313.3, 313.4 and 313.5 below, with any other section of the Zoning Resolution, including those provisions regulating signs, and such conflict could be construed to infringe on Free Speech Messages, the provisions of Sections 313.3, 313.4 and 313.5 shall control.
- Sec. 313.3 **First Amendment Safeguards.** In order to safeguard the protections offered by the First Amendment, the following regulations shall apply:
- Sec. 313.3-1 Every parcel in all zoning districts shall be permitted to display one (1) two-sided or one (1) one-sided ground mounted sign containing any Free Speech Message. Each side of the sign shall not exceed six (6) square feet in area, with a maximum height limitation of four (4) feet above finished grade level. Such signs shall be setback at least six (6) feet from any right-of-way line and at least five (5) feet from all other property lines. In no event shall such sign be erected in the right-of-way. Such sign shall not be subject to the Zoning Certificate requirements of the Zoning Resolution. However, such sign must be kept in good and safe condition.
- Sec. 313.3-2 At any time that the Hamilton County Board of Elections has identified a candidate or issue that will be placed on the ballot at the next general or special election, one sign, in addition to the sign permitted by Section 313.3-1, may be erected for each candidate or issue that the occupant wishes to support or oppose. A sign may also be presented for each write-in candidate. Such political signs shall be subject to the dimensional regulations set forth in Section 313.3-1. All such signs, except for the one sign permitted by Section 313.3-1 shall be removed from display not later than the first Friday immediately following the election.
- Sec. 313.3-3 If a sign permitted in Sections 313.3-1 and 313.3-2 is not maintained in good and safe condition, notice shall be sent to the property owner by regular mail. The property owner shall have seven (7) days from the date of mailing indicated on the notice to restore the sign to good and safe condition. If the sign is not restored to good and safe condition within seven (7) days, and the owner or occupant of the property has not filed an appeal from the notice, then the owner and/or occupant shall be in violation of this Section and subject to Article XXV and the applicable Sections of Article XXVIII. In addition, no sign permitted by Sections 313.3-1 and 313.3-2 shall be placed in any right of way. And such signs in the right of way may be removed and stored by the Township without notice.
- Sec. 313.3-4 Signs authorized by Sections 313.3-1 and 313.3-2 may be erected and displayed without obtaining a Zoning Certificate or a Building Permit.
- Sec. 313.3-5 Every parcel that is permitted to display a sign containing a commercial message or other permitted message pursuant to this Article (Sign Regulations) shall be permitted to display a Free Speech message in lieu of the permitted commercial message on the sign authorized for a commercial message. However, this provision shall not apply to existing signs displaying a message necessary for public safety, such as messages directing vehicular or pedestrian flow, parking restriction signs, or fire lane signs. Whether a sign displays a commercial message or a Free Speech message, each sign shall still be subject to the dimensional regulations imposed in each zoning district, including, but not limited to, size, height, area and setback in the same manner as if it were displaying a commercial message. Signs with the Free Speech message displayed in lieu of a commercial message shall be permitted in addition to signs displaying the Free Message permitted by Sections 313.3-1 and 313.3-2.
- Sec. 313.3-6 No sign except those authorized and conforming to the Ohio Uniform Code of Traffic Control Devices shall be permitted in any public right-of-way. Any sign unlawfully

installed in a public right-of-way shall be deemed abandoned and may be removed and stored by the Township.

- Sec. 313.4 **Signs as Principal Use.** Signs shall generally be considered an accessory use regulated pursuant to the underlying zoning district regulations and this Section 313. However, where no structure or building exists on a parcel, and such parcel is located in a district zoned for industry, business, or trade, or the property is used for agricultural purposes, a single outdoor advertising device shall be permitted as the principal use and may display commercial or Free Messages, including off-premise advertising, with a face area not exceeding seventy-two (72) square feet (6 ft. by 12 ft.), excluding temporary embellishments, cut-outs, or extensions. An outdoor advertising device shall mean a sign displaying a message that is intended to be visible from adjacent property or public right-of-way in the vicinity. The size and location of outdoor advertising devices shall be subject to all regulations set forth in this Code regarding the size, height, location and number of signs permitted on parcels within the applicable zoning district or PUD. Setback and height requirements shall be consistent with the underlying zoning district regulations. On such parcels where a sign is intended to be the principal use, no other structure, building, or activity shall be permitted. On parcels where there is an existing structure or building or a specified activity is intended to be the principal use, all signs shall be considered as accessory and incidental uses and shall be subject to the applicable sign regulations. No buildings, structures or other activities permitted in the zoning district shall be permitted on a parcel on which a sign is used as a principal use unless the sign is changed and used as an accessory use.
- Sec. 313.5 **Appeal Process for Sign Application Denials.** In order to confirm a property owner's ability to exercise his or her First Amendment rights without undue delay, a special process shall be instituted for the appeal of the denial of a Zoning Certificate for any sign which requires a Zoning Certificate to be issued before it is constructed or displayed. To the extent that the appeal process of this Section conflicts with the provisions of Section 183 of the Zoning Resolution, the appeal process of Section 313.5 shall control. The powers of the Board of Zoning Appeals set forth in Section 184, specifically Sections 184.1 and 184.2 shall be construed to include the power to hear appeals regarding the issuance or denial of a Zoning Certificate for signs. The standard that must be demonstrated by the applicant shall be practical difficulties in the case of an area or dimensional variance and the standard of unnecessary hardship in the case of a use variance.
- Sec. 313.5-1 Pursuant to Section 325.8, it shall be the duty of the Zoning Inspector to either approve or deny applications for Zoning Certificates for signs within fifteen (15) business days of the date of application. Any aggrieved applicant shall have the right to appeal the denial of a Zoning Certificate for a sign. Such appeal shall be heard by the Board of Zoning Appeals.
- Sec. 313.5-2 Any such appeal must be taken within twenty (20) days after the decision of the Zoning Inspector by filing a notice of appeal, stating the grounds for such appeal, with the Zoning Inspector and the Board of Zoning Appeals. In the alternative, it shall be sufficient to satisfy this requirement to present the notice to the Administrative Official who shall cause the notice of appeal to be promptly delivered to the Zoning Inspector and the Board of Zoning Appeals. The Zoning Inspector shall transmit to the Board of Zoning Appeals all the papers constituting the record upon which the action appealed from was taken.
- Sec. 313.5-3 The Board shall fix a time for the hearing of the appeal not sooner than twenty (20) days and not later than forty (40) days from the filing of the notice of appeal. The Board of Zoning Appeals shall give at least ten (10) days' notice in writing to all parties of interest, which shall include the owners of all abutting lots and all owners of land within two

hundred (200) feet of the subject property. In addition, the Board of Zoning Appeals shall give notice of such public hearing by one publication in one or more newspapers of general circulation in the Township at least ten (10) days before the date of the hearing.

The appealing party has the right to waive any and all of the time restrictions imposed on the Board of Zoning Appeals. However, absent such waiver, failure of the Board of Zoning Appeals to act within these time limitations shall be deemed an approval of the application for the Zoning Certificate.

Sec. 313.5-4 The Board shall render a written decision on the appeal not later than fourteen (14) days after the date of the public hearing. Failure of the Board of Zoning Appeals to issue a written decision within the stated time shall be deemed an approval of the application of the Zoning Certificate. The Board of Zoning Appeals shall render a decision in accordance with Section 186. Any party adversely affected by a decision of the Board of Zoning Appeals may appeal to the Court of Common Pleas of Hamilton County on the ground that such decision was unreasonable or unlawful. The Court may affirm, reverse, vacate or modify the decision complained of in the appeal. Chapters 2505 and 2506 of the Ohio Revised Code shall be applicable as they pertain to administrative appeals.

**ARTICLE XXXII
TRANSITION BUFFER YARDS**

Sec. 326 The purpose of this Article is to require buffering between residential and nonresidential uses and districts, and other incompatible uses, and to protect, preserve and promote the character and value of surrounding neighborhoods, to promote the public health and safety through the reduction of noise pollution, air pollution, visual pollution, air temperature, and artificial light glare by providing for the installation and maintenance of transition areas in accordance with the standards and requirements of this Article. (STT Res. Z9705 eff. Dec. 4, 1997)

Sec. 326.1 No structure or land which abuts a right-of-way or a boundary between any "A-A", "A", "A-2", "B", "B-2", or "C" Residence District or use and any "D", "E", "F", "G", "O", "H", "EF" or Planned District shall be developed, or redeveloped unless a transition area is established in accordance with the requirements of this Article.

Redevelopment of existing structures shall require conformance with the restrictions of this Article based on the criteria established below:

When the Existing Structure is	Redevelopment is a change in..
0 - 1,000 Sq. Ft.	50% or more of the floor area
1,001 - 10,000 Sq. Ft.	40% or more of the floor area
10,001 - 25,000 Sq. Ft.	30% or more of the floor area

(STT Res. Z9705 eff. Dec. 4, 1997)

Sec. 326.2 The following types of transition buffer yards shall be required, as applicable, in accordance with the provisions of this Article.

Sec. 326.2-1 **Boundary Buffer.** The purpose of a boundary buffer is to separate adjacent incompatible land uses as identified in Section 326.1 and to screen and soften the detrimental impacts of such uses upon one another and upon the surrounding area.

Sec. 326.2-2 **Streetscape Buffer.** The purpose of a streetscape buffer is to shield or enhance views into a parking lot, establish coordination among diverse buildings, setbacks and uses, to retain the quality of the environment by providing appropriate vertical mass in keeping with dimensions of horizontal voids, and to diminish the presence of wires/poles, lights and other clutter along the public right-of-way.

Sec. 326.3 For any buffer required by this Article, a development plan shall be submitted with the application for the Zoning Certificate to the Symmes Township Zoning Inspector to review for compliance with these regulations and any other applicable regulations. The plan shall show the following:

1. The topography of the site.
2. The location of driveway entrances.

4. The location of sidewalks on or adjacent to the property.
5. The location of utilities, barriers, shelters, and signs.
6. The location of landscaped areas and the types, quantity, sizes and location of vegetation to be planted in the areas of existing vegetation and existing and proposed topography.

7. Any other relevant information requested by the Symmes Township Zoning Commission.

Sec. 327 **General Standards for Transition Buffer Yards.** The following standards shall be used to determine the appropriate required transition buffer yard.

The Symmes Township Zoning Commission may modify these Transition Buffer Yard requirements where the topography or other physical features of the tract or its relation to surrounding property make complete compliance with the minimum requirements unnecessary or undesirable, provided the surrounding property and the public welfare are adequately protected.

Sec. 327.2-2 Streetscape buffers shall be located adjacent to the public right-of-way and may be required along private street easements.

Sec. 327.3 No structure shall be permitted within a required buffer other than a wall, fence or berm, or a driveway in the front yard connecting a parking area on the lot to a street or to a parking area on an abutting lot. A driveway in the side yard that connects a paving area on the lot to the street shall not encroach into the buffer area.

Sec. 327.4 When both parcels are owned and being developed by the same owner, the buffer may be placed on either adjoining parcel or astride the boundary.

Sec. 327.5 When adjoining parcels have different owners, the buffer shall be placed on the parcel being developed.

- Sec. 387 **Accessory Uses to Conditional Uses.** Any use or structure that is accessory to a conditional use shall be processed in the same manner as prescribed in this Article for conditional uses. If an application for an accessory use is made concurrently with an application for the primary conditional use, they may be considered together as one application. Whether processed in conjunction with a primary conditional use or as a later supplement to an existing primary conditional use, the accessory use shall meet the appropriate specific criteria listed in Section 386 as well as the general conditions contained in Section 385.
- Sec. 388 **Additional Regulations Pertaining to Conditional Uses.** In addition to the general standards contained in Section 385, the specific criteria contained in Section 386, all conditional uses are subject to the following regulations.
- Sec. 388.1 **Additional Conditions.**
The Board of Zoning Appeals may impose additional conditions and limitations concerning use, construction, character, location, landscaping, screening, timing of implementation, and other matters relating to the purposes and objectives of this Resolution upon the premises benefitted by a conditional use. Such conditions are intended to prevent or minimize adverse effects upon other property and improvements in the vicinity of the subject property or upon public facilities and services or to assure compliance with general or specific standards. However, such conditions shall not be used as a device to authorize as a conditional use that which is intended to be temporary in nature. All such conditions, including the designated specific criteria for a particular use, shall be expressly set forth in the resolution granting the Conditional Use Zoning Certificate. Violation of any such condition, limitation, or specific criteria shall be a violation of this Resolution and shall constitute grounds for revocation of the Conditional Use Zoning Certificate.
- Sec. 388.2 **Effect of Approval of Conditional Use.**
The approval of a proposed conditional use by the Board of Zoning Appeals shall not authorize the establishment or extension of any use nor the development, construction, reconstruction, alteration or moving of any building or structure, but shall merely authorize the preparation, filing and processing of applications for any permits or approvals that may be required by the regulations of the Township and County, including but not limited to, a Conditional Use Zoning Certificate, a building permit, a certificate of occupancy and subdivision approval.
- Sec. 388.3 **Certification Of Conditional Use Plan Compliance.**

- Sec. 388.4 **Affidavit of Compliance with Conditions.**
Whenever any proposed conditional use authorized pursuant to this Article is made subject to conditions or limitations to be met by the applicant, the applicant shall, upon meeting such conditions, file an affidavit with the Township Zoning Inspector so stating. Such affidavit shall be accompanied by a nonrefundable fee as established by the Symmes Township Trustees, to recover the Township's actual direct cost of an inspection to verify that such conditions and limitations have been met.
- Sec. 388.5 **Limitations on Conditional Use Approval.**
The approval of a proposed conditional use by the Board of Zoning Appeals shall be deemed to authorize only the particular use for which it was issued, and such authorization shall automatically expire and cease to be of any force or effect if such use shall, for any reason, be discontinued for a period of twenty four (24) consecutive months or more.
- Except when otherwise provided in the Resolution for approving a conditional use, a conditional use shall be deemed to relate to, and be for the benefit of, the use and lot in question rather than the owner or operator of such use or lot.
- Sec. 388.6 **Amendments to Conditional Uses.**
A Conditional Use Zoning Certificate may be amended, varied, or altered only pursuant to the procedures and subject to the standards and limitations provided in this Article for its original approval.
- Sec. 389 **Period of Validity.** Subject to an extension of time granted by the Board of Zoning Appeals, no Conditional Use Zoning Certificate shall be valid for a period longer than one (1) year unless a building permit is issued.
- Sec. 390 **Appeal of Decision.** Any party aggrieved by the decision of the Board of Zoning Appeals may appeal to the Court of Common Pleas of Hamilton County on the ground that such decision was unreasonable or unlawful.

Sec. 393.2

Standards of Approval for Telecommunications Antennas and Towers in an Area Zoned for Residential Use: (STT Resolution Z-0801, eff. 4-03-08) The following standards shall apply to all telecommunications antennas and towers which are proposed for construction in an area zoned for residential use:

- (a) The telecommunications company shall demonstrate, using the latest technological evidence, why the telecommunications antenna or tower must be placed in a proposed location in order to serve its necessary function in the company's grid system. Part of this demonstration shall include a drawing showing the boundaries of the area around the proposed location which would probably also permit the telecommunications antenna to function properly in the company's grid system. This area shall be considered the allowable zone.
- (b) If the telecommunications company proposes to build a telecommunications tower (as opposed to mounting the antenna on an existing structure), it is required to demonstrate that it has contacted the owners of nearby tall structures within the allowable zone, asked for permission to install the telecommunications antenna on those structures, and was denied for either non-economic reasons or that a clearly unreasonable economic demand was made, by the property owner, based on prevailing market values. "Tall structures" shall include, but not be limited to: smoke stacks, water towers, buildings over thirty-five (35) feet in height, antenna support structures or other telecommunications towers even if owned by other telecommunications companies.

- (c) The applicant must demonstrate that all reasonable means have been undertaken to avoid any undue negative impact caused by the “clustering” of telecommunications towers within an area zoned for residential use.
- (d) The Board may deny the application to construct a new telecommunications tower in an area zoned for residential use if the applicant has not made a good faith effort to mount the telecommunications antenna on existing structures.
- (e) An applicant must demonstrate that technically suitable and feasible sites are not available in an area other than an area zoned for residential use and that the site is located in the least restrictive district that includes a technically suitable and feasible site.
- (f) Telecommunications Antenna/Tower Height

The applicant shall demonstrate that the telecommunications antenna/tower is the minimum height required to function satisfactorily and to accommodate the co-location requirements as set out in Subsection 2(i) of this Section. No telecommunications antenna that is taller than the minimum required height shall be approved. Telecommunications towers shall be monopole construction unless it is demonstrated that another type of tower is required for safety purposes.

- (g) Telecommunications Tower Safety

All telecommunications towers shall be fitted with anti-climbing devices as approved by the manufacturers. Furthermore, the applicant shall demonstrate that the proposed telecommunications tower and its antenna are safe and that the surrounding properties will not be negatively affected by tower failure, falling ice or other debris, electromagnetic fields or radio frequency interference. However, if the specific safety issue in question is determined to be regulated by either Federal Communications Commission (FCC) regulations or applicable building code regulations, and the operation or construction is in compliance with such regulations, then this requirement for safety shall be deemed to have been met.

Subsequent to the installation of a telecommunications tower, if it is determined by the Board of Trustees, upon presentation of proper and sufficient documentation and after a public hearing, that the operation of a telecommunications tower is inherently dangerous or is a demonstrable health hazard, the telecommunications tower shall be declared to be a nuisance and all operation shall cease. The telecommunications tower or antenna shall also be removed as provided under Subsection 3 of this Section. However, no order of removal shall be made if it is inconsistent with applicable FCC regulations.

- (h) Screening

For reasons of aesthetics and public safety, telecommunications facilities shall be effectively screened on each side. Screening shall consist of a solid masonry wall or solid fence, not less than four (4) nor more than six (6) feet in height, a tight screen of hardy evergreen shrubbery, or natural or existing screening not less than four (4) feet in height. The use of razor or barbed wire is prohibited. Screening walls and fences shall be located not less than thirty (30) feet from each property line. Spaces between any screening device and adjacent property lines shall be buffered by use of landscape plant materials including, but not limited to, grass, hardy shrubs, evergreen ground cover, etc. All screening devices and landscape materials shall be maintained in good condition.

(i) Limiting the Number of Telecommunications Towers

In order to reduce the number of telecommunications antenna support structures needed in the Township in the future, the owner of an existing telecommunications tower shall not unreasonably deny a request to accommodate other uses, including other telecommunications companies, and the telecommunications antenna of local police, fire, and ambulance departments. The owner of an existing telecommunications tower may request reasonable compensation for the use of the telecommunications tower.

For the purposes of encouraging co-location of cellular or wireless antenna and other uses, telecommunications towers shall be designed, engineered, and constructed as follows:

- i. towers less than seventy-five (75) feet in height shall be designed, engineered and constructed to support telecommunications antennas installed by one or more telecommunications service users; and
- ii. towers more than seventy-five (75) feet in height but less than one hundred fifty (150) feet shall be designed, engineered and constructed to support telecommunications antennas installed by two (2) or more wireless communication service users; and
- iii. towers one hundred fifty (150) feet in height or taller shall be designed, engineered and constructed to support telecommunications antennas installed by three (3) or more telecommunications service users.

As used in paragraphs i, ii, and iii above, the term “users” shall include the telecommunications antennas of police, fire and ambulance departments. In addition, an applicant must demonstrate that the area acquired by lease or otherwise acquired for the use and construction of the telecommunications tower and accessory structures is sufficient in size to accommodate any additional structures that may be required if additional users are added to the telecommunications tower.

(j) Licensing

The telecommunications company must demonstrate to the Township that it is licensed by the FCC. No approval will be granted to any applicant unless proof of current FCC license for the proposed use of the telecommunications tower is provided.

The owner of the telecommunications tower must also annually provide to the Township on January 1 of each year, a list of all users of the telecommunications tower and each user shall provide the Township with a copy of each users' license with the FCC.

(k) Required Parking

If the telecommunications site is fully automated, adequate parking shall be required for maintenance workers. If the site is not fully automated, the number of required parking spaces shall equal the number of employees working on the largest shift. All parking specifications and requirements shall be consistent with the applicable parking requirements as established in the Symmes Township Zoning Resolution, Article XIV, Sections 143, 144, and 145.

(l) Appearance

Telecommunications towers under two hundred (200) feet in height shall be painted silver or have a galvanized finish retained, or be finished with a neutral color matching its background in order to reduce visual impact. The applicant shall demonstrate that the proposed telecommunications tower is the least aesthetically intrusive facility for the neighborhood and function. It is further recommended that all buildings and structures be architecturally compatible with the architecture of the adjacent buildings and structures. Telecommunications towers shall meet all Federal Aviation Administration (FAA) regulations. No telecommunications towers may be artificially lighted except when required by the FAA. Furthermore, no telecommunications tower or antenna and accessory buildings and structures shall contain any signage. All utility lines serving the telecommunications towers shall be underground, unless there is a demonstrated safety hazard created by underground installation.

(m) Site Plan Required

A full site plan shall be required for all proposed telecommunications sites, except telecommunications antennas to be placed on existing structures, at a reasonable scale, but not smaller than 1 inch to 100 feet (1"=100'), indicating, as a minimum, the following:

- i. The total area of the site; and
- ii. The existing zoning of the property in question and of all adjacent properties; and
- iii. All public and private right-of-way and easement lines located on or adjacent to the property which is proposed to be continued, created, relocated or abandoned; and
- iv. Existing topography with a maximum of five (5) foot contours intervals; and
- v. The proposed finished grade of the development shown by contours not exceeding five (5) foot intervals; and

- vi. The location of all existing buildings and structures and the proposed location of the telecommunications tower and all telecommunications support structures including dimensions, heights, and where applicable, the gross floor area of the buildings; and
- vii. The locations and dimensions of all curb cuts, driving lanes, off-street parking and loading areas including the number of spaces, grades, surfacing materials, drainage plans and illumination of the facility; and
- viii. All existing and proposed sidewalks and open areas on the site; and
- ix. The location of all proposed fences, screening and walls; and
- x. The location of all existing and proposed streets; and
- xi. All existing and proposed utilities including types and grades; and
- xii. The schedule of any phasing of the project; and
- xiii. Documentation which shows all buildings and structures on adjacent lots and any additional lot which has a lot line within five hundred (500) feet of the lot on which the telecommunications tower is proposed to be located. The approximate elevation of the highest point of each building or structure shall be noted. Applicant may identify any additional features in the area (such as existing screening, fences and topography) which may be helpful in considering the impact of the proposed telecommunications tower on nearby property; and
- xiv. Any other information as may be required to determine conformance with the Symmes Township Zoning Resolution.

For telecommunications antennas to be placed on an existing structure, the applicant shall submit such information as required by the Township Zoning Inspector to insure compliance with the applicable provisions of this Section.

Sec. 393.3

Maintenance: Any owner of property used as a telecommunications site shall maintain such property and all structures in good condition and free from trash, outdoor storage, weeds and other debris. Any owner of a telecommunications tower that has determined to cease operation, discontinue service or transfer ownership shall be required to give written notification to the Township Zoning Inspector of such intent not less than thirty (30) days prior to its cessation of business, discontinuance of service or transfer of ownership. Facilities shall be removed from the site within six (6) months of ceasing operations. Resale or renting of facilities is permissible only to other telecommunications companies subject to the issuance of a Zoning Certificate from the Symmes Township Zoning Commission.

Discontinued shall mean that the structure has not been properly maintained, has been abandoned, become obsolete, is unused or has ceased the daily activities or operations which had occurred.

Any telecommunications tower removed from its service for a period of six (6) continuous months or more and that has not been removed is hereby determined to be a nuisance.

Whenever, upon inspection, it shall appear that a telecommunications tower has been abandoned or its use discontinued, the Township Zoning Inspector or a designated representative shall notify, either by personal delivery or by certified mail, the owner of the property on which the tower is located that the tower must be taken down and removed. If the telecommunications tower is not removed after appropriate notification, the Township Zoning Inspector may take appropriate steps to have the tower and facilities removed and recover costs of such removal jointly and severally from the property owner and communications company.

Sec. 393.4

Miscellaneous:

- (a) No telecommunications tower shall be permitted on any lot on which any non-conforming building or structure is located nor upon which any non-conforming use or activity is occurring without first obtaining a variance from the Township Board of Zoning Appeals.
- (b) No telecommunications tower shall be constructed, replaced, or altered without first obtaining the applicable building permit.
- (c) Proof shall be provided by the applicant in a form satisfactory to the Board that the proposal has been approved by all agencies and governmental entities with jurisdiction, and conforms to all applicable requirements of the Ohio Department of Transportation, the Federal Aviation Administration, the Federal Communication Commission, or the successors to their respective functions.
- (d) Any special Zoning Certificate issued under this Section shall be revocable and may be revoked after notice and hearing if any continuing condition of the Zoning Certificate has been violated and is not remedied within thirty (30) days of written notice from the Township Zoning Inspector.
- (e) If it is determined that any provision of this Resolution is inconsistent with Section 519.211 of the Ohio Revised Code, then the Resolution shall be interpreted and applied in a manner most consistent with Section 519.211.

Sec. 394

1. Location of the temporary sales;
2. Size of the business;
3. Location and intensity of the display of goods;
4. Parking adequacy;
5. Hours of operation;
